The Next Generation of Network Optix: Gen 6 Enterprise Launch

Network Optix (Nx), a global leader in intelligent video management solutions, is proud to announce the next evolution of Nx EVOS. Introducing Gen 6 Enterprise, Network Optix's official transition into a subscription-based (SaaS) model. This update to our services is designed to make management across your networks of systems and channels more efficient, building upon Gen 6 Pro's features with new exclusive capabilities tailored for enterprise-level operations.

Gen 6 Enterprise: Revolutionizing Enterprise Video Management

Gen 6 Enterprise sets a new standard for enterprise video management. By transitioning to a subscription-based (SaaS) model, Network Optix is able to provide unparalleled scalability and support. Gen 6 Enterprise is more than a simple software upgrade, it's an investment, one that will empower your organization with a powerful operational management solution that evolves with your business.

Features Unique to Gen 6 Enterprise:

- **Unified Notifications:** Centralize all of your system notifications from a single interface through Nx Cloud, for critical insights at your fingertips, anytime, anywhere.
- **Unified User Management:** Seamlessly manage users across multiple sites, hives, and servers via Nx Cloud to simplify admin control and security permissions throughout your organization.
- **Unified Health Monitoring:** Monitor the overall health and performance of all sites, hives, and servers within your organization through a unified dashboard.
- **Nx Connect:** A brand-new component for Nx EVOS, Nx Connect simplifies the management of resellers, installers, licenses, and billing, combining all of these into a single application.
- **Nx Maps:** Use 2D/3D mapping to monitor and manage your IP devices. With this feature, you can view and control your system through a singular mapped-out interface.

Simplify Your Licensing Management with Nx Connect

Nx Connect is a brand-new feature that allows you to manage the licenses and billing of your subscriptions through your various resellers and installers. Through this easy-to-use interface, you can interact with and manage your licenses throughout the different levels of your company, from the top down to the individual reseller.

Map the Way Out with Nx Maps

Another fantastic way to manage your VMS, Nx Maps allows you to integrate cartography into your system to easily view the location and status of all your IP devices. This new feature is completely scalable and customizable, allowing you to map out anything from a single office floor to an entire city-wide network.

Continuous Updates and Enhancements Through Nx Cloud

Gen 6 Enterprise subscriptions also include access to continuous updates and enhancements via Nx Cloud. These constant updates and support ensure your system remains in perfect shape, no matter how you use it.
