About Han Solo

Han Solo: He wasn't a human!

Han Solo, captain of the mighty Millennium Falcon and a pivotal force in the Rebel Alliance, has lived an eventful life up until his death at the hands of his son, Kylo Ren. But did you know that Han wasn't even a human in the original Star Wars script? Han's initial draft was that of a green alien, but George Lucas later changed the character into a young pirate in Corellia. A wise decision indeed! Otherwise, we'd be looking at a green monster instead of the sexy smuggler we've come to love.
