

[Low fawn recruitment over past three years leads to fewer tags on Kaibab](#) December 13, 2022 Arizona

Williams-Grand Canyon News

... the north Kaibab is home to the largest and most productive deer herd in Arizona ... the main reason for the drop in tags was in response to low fawn recruitment over the past three years... the department does ground surveys annually ...

[Early Kaibab deer hunt is not what it used to be, and here's why](#) November 24, 2022 Arizona, Kingman Daily Miner

... the north Kaibab is home to the largest and most productive deer herd in Arizona... On the Kaibab, biologists are aware that it is not the summer range that limits the deer herd there. It is the winter range, and without sufficient moisture and food production in those areas, the herd can suffer and there can be a die off. This year the Kaibab received lots of rain and the winter range looks in good shape ...
