

## Information Handling Policy

Last updated: July 21, 2026

### Overview

Welcome to Street View: Maps for Google. This application offers immersive exploration and navigation tools through panoramic views, live maps, virtual tours, and smart vision features. The app carries an age rating of 4+ and requires an active, automatically renewable subscription to access all content and tools. There are no free features available within the application. Please note this is an independent app and is not affiliated with, endorsed by, or sponsored by Google LLC or its services. We utilize publicly available map and imagery data to provide our virtual travel and historical imagery services.

The app features 360-degree street views, real-time GPS positioning, and historical time travel imagery.

Users must purchase a premium subscription to access the application.

Subscription plans include Exclusive Access for 7 days or Exclusive Access Year for 1 year.

All brand names, trademarks, and copyrights belong to their respective owners.

### What Information We Collect

Our application operates without requiring user registration or authorization. We solely gather specific, limited data points necessary to understand app usage and improve our navigation services. Cookies and similar local data processing methods are not used within this application. All collected information falls strictly into three defined categories designed for analytics purposes.

User ID: An anonymous identifier assigned to track overall usage patterns.

Device ID: Hardware-specific identifiers used to ensure proper app compatibility.

Product Interaction: Records of screen taps, feature usage, and offline map downloads.

### How We Process Your Data

We process the collected data strictly for analytics, advertising attribution, and delivering system alerts. Information is shared with select third-party service providers to facilitate these core operations. Processing happens in real-time as you navigate the live map or utilize the smart vision tools. We do not maintain detailed behavioral profiles or sell your personal data to external data brokers.

Firebase handles analytical data to monitor app performance and stability.

Adjust processes attribution data to measure the effectiveness of advertising campaigns.

Pushwoosh utilizes device tokens to deliver relevant push notifications to your screen.

### AI Processing

Street View: Maps for Google incorporates artificial intelligence to power features like Smart Vision and instant text translation. We rely on third-party AI services and external APIs to generate content and analyze camera inputs. When you point your camera to identify places or translate text, these prompts are sent securely to our external AI providers.

External APIs are utilized to generate accurate translations and location identifications.

User prompts and camera inputs are processed solely to deliver the requested response. Input data is not stored long-term beyond the immediate time required to generate the output.

#### Security & Privacy Measures

Protecting the limited information we collect is a fundamental priority for our development team. We implement industry-standard security protocols to safeguard your User ID, Device ID, and interaction data. Network traffic between the app and our third-party services is encrypted in transit. Access to analytical dashboards is restricted to authorized personnel only.

The absence of user registration ensures no sensitive personal profiles are maintained.

The 360 Offline Mode allows map downloads to minimize constant data transmission.

Third-party partners are vetted to ensure compliance with modern privacy standards.

#### Your Rights and Choices

You retain full control over your device permissions and subscription status at all times. Because we do not mandate user accounts, data deletion requests are handled by resetting your device identifiers in your system settings. You must actively manage your auto-renewable subscriptions through your Apple account settings. Payment is charged upon purchase confirmation, and standard prices match the App Store Price Matrix for your region.

Subscriptions auto-renew unless turned off at least 24 hours before the current period ends.

Free trials automatically convert to paid subscriptions unless canceled in Account Settings.

Any unused portion of a free trial is forfeited upon purchasing a premium plan.

You can disable push notifications or ad tracking directly via iOS system settings.

#### Contact & Support

We encourage users to review our full legal documentation for a comprehensive understanding of our practices. Our support channels are available to assist with subscription inquiries, feature navigation, or privacy concerns. Remember that you must be subscribed to access the app content, as no free features exist inside. Please consult the links below for our detailed policies and terms.
