

Week of May 25 ---

¡Hola Amigos!

You have made it to the LAST week of school amigos. It is a strange end to the year but I know you have learned a lot about yourself and there have been some good for each of us that we can focus on in all of this. I'm so proud of the work that you have done. You have worked so hard this far, finish strong!

This week we are going to study our food words a bit more on quizlet and then make your own menu to your very own restaurant! You get to name your restaurant and you have the freedom to make it how you would like! If you want it to be just breakfast and lunch (desayuno y almuerzo) or just dinner and dessert (cena y postres) or if you would like to have it open all day...it is completely up to you :) Make sure to include a drinks "bebidas" section in any menu you do. Make sure that **ALL WORDS** on your menu are in Spanish. Think of it as a restaurant where your customers only speak Spanish :)

You can make a poster menu with drawings of a few of the dishes, a slides menu with pictures you find of a few of the dishes, or a folded menu with different sides being different categories, desayuno, almuerzo, cena, postres, bebidas.

When you are done, either send me a picture, make a video explaining it, or send me the link to the slides.

Before you start your project, please spend **at least 15min** going slowly through the flashcards on both Quizlets that we have done in the last two weeks, links below. Listen to the word, look at the picture and say the word, do this twice on each card and then flip to the next card. You can do the match game after that if you would like. There are more words this time around and I don't expect you to memorize them all, but they will be helpful for your final project!
