Abstract

These instructions are manuscript / article templates used in articles published in AT-TASYRI' starting in June 2017. Articles are written using A4 paper with top and left size 2.5 cm and bottom and right 2.5 cm. Articles begin with Article Title, Author Name, Author Affiliate Address, email, followed by abstracts written along 150-200 words. Especially for Abstracts, the text is written with the font size of 12 pt and the type of TNR and the distance between single-spaced lines. The Abstract section must contain the core problems to be raised, the method of solving them, and the findings obtained and conclusions. Abstracts for each language can only be written in one paragraph in a single column format.

Keywords: *maximum 5 words*

Abstrak

Petunjuk ini merupakan template manuskrip/artikel yang digunakan pada artikel yang diterbitkan di AT-TASYRI' mulai penerbitan juni 2017. Artikel ditulis menggunakan kertas A4 dengan ukuran top dan left 2.5 cm serta bottom dan right 2.5 cm. Artikel diawali dengan Judul Artikel, Nama Penulis, Alamat Afiliasi Penulis, email, diikuti dengan abstrak yang ditulis sepanjang 150-200 kata. Khusus untuk Abstrak, teks ditulis dengan ukuran font 12 pt dan jenis huruf TNR serta jarak antar baris satu spasi. Bagian Abstrak harus memuat inti permasalahan yang akan dikemukakan, metode pemecahannya, dan hasil-hasil temuan yang diperoleh serta simpulan. Abstrak untuk masing-masing bahasa hanya boleh dituliskan dalam satu paragraf saja dengan format satu kolom.

Kata Kunci: *maksimal 5 kata*

A. INTRODUCTION

The article is written using the Time News Roman font with a size of 12 single spaced characters. The introduction contains a brief background of the research, a brief review of various previous studies as well as the research gap from the current research as well as a brief purpose of the research.

Example.....

The development of sharia banking in Indonesia is quite rapid and has a considerable opportunity, it was felt after the government and Bank Indonesia gave a big commitment by taking various policies to develop sharia banks.

As of 2009, there have been six Sharia Commercial Banks (BUS), 25 Sharia Business Units (Sharia Division), 138 Sharia Rural Banks (BPRS) with a total of 1223 sharia banking offices spread throughout Indonesia. To be able to know the development of the number of sharia banking and banking offices in Indonesia for the last five years can be seen in the table below.

TABLE 1
Development of Sharia Bank

Type	2005	2006	2007	2008
Sharia Commercial Banks				
• Total Bank	3	3	3	5
• Total Office	304	349	401	581
Sharia Business Units				
• Total Bank	19	20	26	27
• Total Office	154	183	196	241
Sharia Rural Banks				
• Total Bank	92	105	114	131
• Total Office	92	105	185	202
Total Office	550	637	882	1024

Source : Bank Indonesia

One of the banking performance measurement ratios is profitability used to measure management effectiveness based on the results obtained from sales and investments. Profitability is the percentage comparison between profit with assets or capital that generate profit [4]. Banking in this case is required to increase profitability because profitability is one indicator to measure and evaluate the performance of bank management and productivity in managing banking assets as a whole, so with high profitability banks are expected to continue to run the business and improve its performance so that the community needs will be fulfilled. Profitability also indicates whether the business entity has a good prospect in the future, so the higher level of profitability of a business entity then the survival of the body will be more secure [9].

B. LITERATURE REVIEW

The literature review contains a study of various theories that underlie the emergence of research which contains various theoretical foundations of the variables used in this study. The writing uses the APA 6th Edition (American Psychological Association) format. For One source citation with one author: (Jones, 1998: 25). One source citation with two authors: (Jones and Freeman, 1980: 20). One citation source with more than two authors: (Jones et al., 1997: 25). Two sources of citations by different authors: (Jones 1987: 27; Freeman 1988: 56). Two sources of citation with the same author: (Jones 1988; 1999). If the year of publication is the same: (Jones, 1999a; 1999b). Sources of citations originating from the work of an institution are written by mentioning the acronym of the institution

concerned, for example (MES 2012). Or use footnote¹. Every writing must be consistent using footnotes or bodynotes ²

Example.....

This study is based on the research of Dendawijaya [4] which suggests the impact of the existence of Non Performing Financing (NPF) which is not fair one of them is the loss of opportunity to obtain income from credit given, thus reducing the profit gain and adversely affect profitability.

Farashita Aulia [1] also examined the effect of Current Asset Ratio (CAR), Financing To Deposit Ratio (FDR), Non Performing Financing (NPF) dan BOPO to Profitabilitas (Return On Equity) dan The result of this research shows that Current Asset Ratio (CAR) and BOPO had a negative and significantly influence on Return On Equity (ROE). Financing To Deposit Ratio (FDR) had a negative influence on Return On Equity (ROE), but it doesn't significantly influence Return On Equity (ROE). meanwhile, Non Performing Financing (NPF) has a positive and significant influence on Return On Equity (ROE).

In relation to previous studies, the hypothesis proposed and which will be tested are as follows:

H1 : Non-Performing Financing Influence Negative and Significant Against Return On Equity.

C. DATA & METHOD

The research method contains: the type of research (quantitative, qualitative, Mix, R&D), sampling method, population and sample, analytical tools and reasons for their use. (Font: Candara size 12)

D. RESULT & DISCUSSION

The discussion contains the results and analysis of the study. Results contain the results of data analysis.

Example table:

Table 1		
Demografi Responden		
Data/Name/Source	Freq..	Percentage
Man	75	75%
Women	25	25%

Source: processed by author 2018

**Table without
vertical lines**

The analytical study contains a combination of data exposure, theoretical studies and previous research which are combined into one study that explains various proofs of hypotheses or answers to various studies carried out.

E. CONCLUSION AND SUGGESTION

Conclusions describe the answers to the hypotheses and/or research objectives or findings obtained. The conclusion does not contain a repetition of the results and discussion, but rather a summary of the findings as expected in the objectives or hypotheses.

Example.....

In order to maintain the stability of the number of problem financing (NPF), the bank should always be proportional in applying prudential regulation (prudential regulation). That is, the bank should not be too easy and also not too tight in providing financing. So the amount of Non Performing Financing (NPF) does not jump sharply that if it happens can disrupt the profitability of sharia bank..

F. Acknowledgments

ex. thanks to the ministry of religion for providing research grants so that this article can be written. then to the research team, and the family who supported the birth of this article.....

LITERATURE/REFERENCES

All references referred to in the text of the article must be listed in the Bibliography. The Bibliography should be written in accordance with the APA 6th Edition (American Psychological Association) format.

References use reference manager by following the **Mendeley format**.

The number of pages in a journal article is between 12-17 pages.

Literature in the form of scholarly journals:
