

Mapping the 'sludge entity': the geography of a mind-invading organism

Abstract:

[Image description: A map of the Great South Asian Rip in Reality, showing the Mumbai Strip. The region throughout which the sludge entity's body is spread has been marked; the map also includes its vestigial portions {i.e. dead or broken-off parts; the broken-off parts are small & connected to the main body from dead parts.} [IMAGE NOT FOUND, CHECK AGAIN LATER]

[FULL ABSTRACT NOT FOUND, CHECK AGAIN LATER. THIS IS KNOWN: The abstract briefly notes that the entity could evolve into something else, and goes into precautions to be taken against it, and also that its *epicentres* are slowly decreasing in number, thus its effect is decreasing.]
