

Celo Governance Call #23

November 17, 2022

CGP 00XX: Celo India DAO (Chitty) ([Link](#))

- Summary: This proposal requests \$200K USD worth of CELO to grow the Celo community in India. Over the course of 1 year, the team expects to spend the funds on 2 Hackathons, 50 meetups, 10 regional advocates, and routine content marketing.
- Why It's Needed: This DAO would promote the growth of Celo in India, similar to the other regional DAOs that have recently been proposed.
- Discussion Points:
 - The team will start with 1 advocate per region, but they are open to more if needed for bandwidth regions
 - The multi-sig signers have known each other for several years and have worked together in a professional capacity.

CGP 00XX: Celo India DAO (Monish) ([Link](#))

- Summary: This proposal requests \$60K USD of CELO to grow the Celo community in India to organize activities over the course of 1 quarter as a pilot, and it is a separate but similar request to the one above. The planned activities include 3 meetups, 1 hackathon, and working with students in various ways.
- Why It's Needed: This DAO would promote the growth of Celo in India, similar to the other regional DAOs that have recently been proposed.
- Discussion Points:
 - The team joined the Celo community for the mission. They are building a ticketing platform on Celo, and that got them interested in growing the community.
 - Multi-sig members have known each other for about a year.
 - Will do hackathons and meetups in different areas (e.g. Goa, Pune), depending on the community needs.
 - The DAO will use a Celo multi-sig wallet, but no other details about DAO tooling were given.
 - They would be open to changing the name so it's clear it's a different proposal than the other Regional DAO proposal

CGP 00XX: ([Link](#))

- Summary: In conjunction with listing CELO & cReal on Mercado Bitcoin, the exchange would like to do a Learn to Earn program to help people understand Celo and encourage them to buy it.
- Why It's Needed: This proposal would help introduce Celo to millions of people in Brazil.
- Discussion Points:
 - The total request is \$300K.

- What do people do when they get the rewards? In past Learn to Earn Programs, participants kept the associated coins more than non-participants did.
- They are open to using any self-custodial wallet with a strong security track record that supports Celo.

Celo Community Fund Update
