

Team Mansfield Technology Permission Slip

Throughout this school year, we will be using a rich and diverse set of technology tools. These tools will range from physical devices to the apps and websites used on them. Before we can allow you to access these web tools, there are some specific expectations that need to be followed.

Devices and Applications will be used for educational purposes only

Access to the Internet and the school computer network is a privilege, not a right.

BE SAFE – Passwords are secret. Don't share your password or use anyone else's password. It's like stealing a key and is an invasion of privacy. Never reveal personal information including your or another's personal address and telephone number.

BE HONEST – Observe copyright laws. Be certain to cite sources properly.

BE POLITE – Do not insult or lie about anyone or use offensive language, not even in private messages to friends. This includes materials created off-school and accessed at school. Hate mail, harassment, discriminatory remarks and other antisocial behaviors are prohibited.

BE FAIR – Use the Internet, which includes email and Google Docs, for schoolwork only.

BE CONSIDERATE – Do not waste time online.

BE ALERT – Report any security problems, violations or abuses to your teacher.

BE RESPONSIBLE – Hardware or software shall not be destroyed, damaged, modified or abused in any way.

The inability to follow these expectations *may* result in the following:

Loss of Internet privileges
Request to replace damaged devices
Meeting between family and administration

☐ By checking the box, we are agreeing with the expectations and terms provided above.
