

LINGUISTIC IMMERSION

Camp Extremadura Cáceres Romangordo

In the camp almost every day we played different games and worked on activities with the camp monitors. It was great fun.

There were also days we went to very nice places, like Monfragüe. In Monfragüe we climbed mountains to reach a castle and we saw the longest river in Spain, the river Tajo. We also went to a place called Salto del Gitano. Then, we went to see a short where they taught us things about Monfrague and the animals that are found there . Finally, we went to a museum where we found the name of animals, where they are and where we can see them. There were also names of trees and plants and we learnt how we can use certain plants.

We also visited Trujillo. We did an activity that involved asking people from Trujillo traditional things. The aim was to find some places to get to the castle of Trujillo. The one who got first won. Then all

groups entered the castle. There we saw stones that had words written on them and almost everything was old.

Finally we also biked around the town of Romangordo. Each day involved a different activity.

We made friends with the pupils from Jaen, who were also in the camp and also got to know our classmates and our two teachers, Enrique and Jesús, better.

We had a very good time. We saw new things we learned a lot. I hope that next year we can participate again.

The truth is that it has been a very beautiful experience. Never let an opportunity like this escape!
