

Drain Smart and Protect Our Watershed Walking Assembly Script

What is a “walking assembly?”

A walking assembly is a way to spread the word about your project! Together as a team, decide who will go to each classroom to present the details about your Campaign.

DIRECTIONS:

Edit this script as you need, to fit your Campaign. Print this script and distribute it to those who will participate in the walking assembly. Visit each classroom and present the script to fellow students. We suggest bringing a few flyers as visual aids. You can also use this script as a part of morning announcements, a school-wide assembly, or as you see fit in your school community.

Drain Smart and Protect Our Watershed Walking Assembly Script

Note: Some elements of this script can be deleted to fit the resources available to your team.

Introduction

Hi! I'm _____ (*name*) and I'm part of the Grades of Green Team here at _____ (*school name*). Grades of Green is an environmental education organization that supports our school's green efforts. Our school is participating in their LAUNCH Program to roll out the Drain Smart and Protect Our Watershed Campaign to help our school decrease water pollution and clogged sewage pipes.

The Facts

Did you know that over 50% of our water bodies in America are polluted and unsafe for us to drink, fish, or even swim in? Not to mention the fact that it costs \$400 million dollars to fix pipes clogged by non-flushable wipes.

(Insert your own additional facts here!)

We are going to reduce our school's water pollution by educating students on the benefits of protecting our watershed and smarter draining habits. We need your help to make this program successful.

Closing

By making small changes in our draining habits and reducing our water pollution, we are doing a lot to protect our environment. We will keep you updated on how our Campaign is going through _____ (*insert method here, ex. morning announcement, newsletter, etc.*). Go _____ (*school mascot here*)!
