ET's Friend or Foe? Submitted by Blue Alien (blue@coastalnet.com)

CSETI and Dr. Steven Greer seem to live in some kind of "dream state" with their unshaken belief in a benevolent alien presence. The cattle "mutilation" syndrome seems to be directly related to the UFO and alien presence. What does Greer think of the cattle mutilation problem? Well, first of all, he does not even refer to it as cattle mutilation. Cattle mutilations have been going on for decades. That in itself is not quite a "friendly gesture." Yes, I know we slaughter cattle to eat, but then again we are not a super technological and spiritual race of beings like Greer's alien benefactors supposedly are.

The Disclosure Project was a good idea with good intentions on the part of Dr. Steven Greer....but, "banning all space weapons"? And the technology we received from our space brothers was not without a price tag...abduction. In the 1960's another horror story crept into or out of the UFO community. It was human mutilations. The same type of mutilations of cattle were reportedly found on human corpses. But nobody wanted to deal with this terrible subject matter. It

was quickly reduced to "disinformation" or material spawned out of sensationalism.

In 1988 a story was out based on a secret report relating to the death of an Air Force Seargent, J.P.Loulette who was abducted at the White Sands missile test range in March of 1976. His body was found 3 days later in the middle of the desert terribly mutilated (in the same way as cattle) and his entire body was drained of blood.

William "Bill" English was a member of special forces and a captain in the Green Beret in Laos 1969-1971 when he and his ten man team were sent in to investigate the crash of a B-52 Bomber. Before the bomber went down communications were received..."under attack by a UFO"..., ..."a large light"....Bill and his team found the B-52 sitting in the jungle "intact".

There was no indication of a crash landing. Even though the entire bomber was intact, the crew was found dead. Not just dead, but still sitting in their safety harnesses and mutilated. They were mutilated in the same way as Sgt. Loulette and other human beings yet to be found to this day.

There are many other mutilation cases on file from different parts of the world. All the mutilations are similar, all organs removed with precise surgery and blood drained.

A police officer by the name of Don Ecker of Idaho told an audience of over 400 top UFO investigators at a 1989 conference, that he had personally investigated human mutilations in his state. When he attempted to access information of similar cases which may have been filed in the Justice Department computer, he was told that the files concerning these human mutilation cases were "classified." He was warned to cease all attempts to request such data in the future.

The UFO community is divided when it comes to the intentions of the aliens. There are those, like Steven Greer, who see these extraterrestrials as advanced

beings bearing gifts and there are those who do not, and see these beings as malevolent intruders with an unknown agenda.

There is ample enough evidence to suggest that there is a danger present. At least enough evidence to encourage cautiousness when dealing with extraterrestrials. I do not advocate all out hostility towards all extraterrestrials, but we need to keep an open mind and a cautious approach to any race of beings. And we need to stay unified in the UFO community, no matter what our differences may be. And, No, Dr. Steven Greer, we do not need to stop building a defense system.

Abduction, cattle and human mutilations are crimes, plain and simple, and they are NOT indicative of a benevolent alien race. Let's keep our heads out of the dirt and our eyes to the sky.

Dr. Greer responds: Submitted by: Debbie Foch
(dfoch@disclosureproject.org)

I will respond for Dr. Greer, as his assistant (one of them - volunteer)
Information that we have about the cattle mutilations and abductions is that many or most of them are done by covert operations groups - humans. However, this will be proven through witness testimony in congressional hearings, hopefully.

All the information we have about ET involvement is that they are not hostile.
There are misinterpretations related to some contact experiences and their interfering with our weapons systems, but so far we have no reason to believe that they are other than neutral to friendly. We are open to other possibilities, but we certainly don't believe it to be wise to engage in any wars with them.

- - - - -

Art Wholeflaffer responds:

Even at this date, we still don't know what group or groups of ETs we are dealing with, what faction they represent from their societies (if that even applies), what their relationships are with the other, and if those different ET factions are at peace with each other or at odds or war against each other. We

can't really assume that there really is a so-called "Federation" of ET races, which of the groups belong to that organization and who has been rejected or refuses to join. In a nutshell, we have very little information about the numerous off-world races interfacing with our Earth. Only by interpreting their actions, which seems purpose-driven but ultimately unclear, can we begin to formulate some theories on extraterrestrial behavior. We have to take into account such books as David Jacobs "The Threat", Bob Pratts "UFO Danger Zone" and Timothy Goods "Alien Base."

It is true that certain actions of off-world races: human abductions, animal and human mutilations, human cloning, alien implants, contact with a secret military group, appears downright disturbing if not frightening. There also seems to be other ET groups with a more benign agenda, pushing us towards a more environmentally sound and helping us to develop our spirituality.

Even so, there has not been, to my knowledge, open contact between any group of ETs with a large faction of the human race. This leads any researcher to conclude that there is a dual cover-up, one by the ETs themselves and one by the super-secret corporate/military faction that controls and manipulates this data and back-engineers the alien hardware.

One more problem I have with Dr. Greer's efforts is his ultimate agenda. His altruistic purpose is fine and dandy on paper, but publicizing the ET reality won't solve any problems down here on Terra Firma. The reason being is that the top-secret groups that control and regulate the ET information have nothing to gain by releasing this data and everything to lose. The industrial system is stacked against the public at large. The global energy base of oil, coal, nuclear can be discarded already without the use of back-engineered alien technology. By shifting to photo-voltaic cells, wind, hydrogen, tidal, ocean thermal, geothermal, and bio-fuels, we could solve all of the worlds energy needs and clean up a huge percentage of the pollution that contaminates our air, water and soil. But that is a financial and political decision that the public

must understand and endorse. The largest industries in the world are the energy companies and it's related auto manufactures. Until the public demands clean energy sources and alternative transportation instead of the massively polluting SUVs that are being driven around, no amount of alien hardware will change anything. Notice to Dr. Greer-shift your priorities to a more progressive, humanistic and spiritual agenda and you will persuade many more people.

America's military and related aerospace industries have known about the Extraterrestrial presence since at least the 1947 Roswell dual UFO crashes. Certain industries have been privy to back-engineered alien technology for over 50 years. All of this classified information is heavily compartmentalized, with no one group having the entire picture. In addition, civilian-research UFO groups have been heavily infiltrated throughout the decades and UFO researchers and witnesses have been threatened, intimidated and killed. This still goes on to this very day. UFO abductees and investigators from Dr. Karla Turner to Jim Keith met some very untimely demises. There have been many others.

The body of objective scientific evidence to prove the alien presence is overwhelmingly in the positive and much extraordinary information has been made available. Correspondingly, there would be no easy way to inform the public of the totality of the Extraterrestrial existence, and no one government or military group to present it. The situation is extremely complex, with some of the data quite disturbing. The sudden announcement of the true reality of ETs would have a profound effect on Earth's cultural, financial, religious, and social institutions. In fact, it may be even more sinister than that; there appears to be undeniable proof of a working relation between members of certain Intelligence Agencies; the Pentagon and various off-world races that is totally separate from the perhaps hundreds or even (tens of) thousands of contactee cases from around the Globe.

One needs to factor in the perpetual hybridization program of ETs with humans,

the thousands of yearly animal mutilations happening on a worldwide basis and the still unexplained phenomenon of crop impressions, some with very complex geometric formulas that cannot be duplicated by mankind. There also has been state-of-the-art scientific research into investigating alien implants inserted into humans. The purpose of these alien implants appears to be to monitor and control human behavior. Likewise, the physics and materials research of the alien craft, some of which have been back-engineered by covert aerospace industries for over 54 years, have been incorporated in American weapons and space programs.

The total purpose of the alien agenda must still remain a huge mystery to the top intelligence communities (NSA, NRO, NSC) that monitor and control the information flow. This makes the entire extraterrestrial reality extremely complicated to comprehend and explain to the society at large. These are all good reasons for the continued metered-release of the information, instead of the just one big announcement. This program seems to be working since the majority of Americans have now heard of ETs, abductions, Area 51, and other aspects of the alien presence, and no one seems to be panicking, yet!

The bottom line is that the alien presence is real and purposeful but it is well covered-up and for now it is not applicable to our global system. Our goal should be to change our planet from a militaristic, exploitative and polluting one to a compassionate, clean, healthy and purposeful one. After that, perhaps we can have open contact with the ETs. Anybody have any ideas how we can accomplish that?

sk8er424@aol.com (CNote) added:

Cattle Mutilations aren't for food. Its for genetic material which is sorely needed for their dying race. Their spiritual awareness came through nuking the shit out of each other and living underground based on genetic reproduction and DNA manipulation. Which in a sense gave

them the ability to weed out all factors or lustful, lower chakric emotions and behavior. The problem with that is they are now lost with no feelings, or emotions. That's why most humans fear that grey emotionless dilated/black eyed face. Their trying to reverse through hybridizing and the genetic material. Most of the flesh taken is of areas of high tissue reproduction.

As far as abductions go, they aren't what is commonly conceived. An abduction is being brought into another reality usually non-physically although some people are physically taken. Sometimes it results in physical examinations, but more often it is psychic examinations. You must understand the human psyche first. We have a conscious mind, a sub-conscious, and an unconscious. The aliens are just conscious. Everything which is hard for our conscious mind to deal with or anything along that lines is dumped into the first levels of the unconscious mind (repressed memories). When you come into contact with an ET just being in their presence and communicating with them telepathically brings you into another reality, which most of it takes place in the vast area we call the unconscious. So any memories you delve into from that realm while in your waking conscious mind are also going to be filled with all of your own demons and repressed memories. This is where the idea that abductees are actually people who were sexual abused has some truth, but doesn't negate contact with extra-terrestrials. Everybody has had ET contact at least once in their life, whether it was through dream, telepathy, actually physical contact, or what not. That's why most people have an instinctual negative feelings when they see lets say a sketching of a grey or the idea of grey aliens, because it reminds them of their own demons. In a sense when a contactee stares into a grey/zetas eyes they are being shown a mirror of themselves which brings out the many human fears we have, and the grey/zeta is given a slight remembrance of how they used to be before they nuked the shit out of each other which brings out a mental stimulation of fear (nothing compared to the humans fear)

which is an emotion which is what their trying to learn about again.

So in a way we both benefit, it just depends on how insane, self-centered, and secluded humans want to be with the subject in society. Its kind of like that whole karma thing fitting together like a puzzle piece. Their are documents out at majestic documents which talk about how the EBE's are very deceptive. How they abducted more people than they said they would, and aren't operating in the secrecy we requested. In a way that's the governments karma coming back at them for being such a deceptive institution since the time when they nailed that compassionate guy up on a cross, and replaced his halo with a crown of thorns, and then not to later in history were like, oh wait, this guy was god you should worship him, here come into this temple once a week and listen to OUR version of the story. The aliens are just simply enlightening more people, and making their presence more known. The majority of all contactees are positive (usually at first their experiences a fearful but come to a realization over time), like in the movie Intruders, or Communion. It's just the scary torturous ones hit people harder and get more coverage because its like a horror movie in reality, giving people a little thrill. Lets kick some big-eyed alien butt..... Yea were bad-ass humans. As far as implants and chips go, that sounds a lot more like government shit to me. I believe these abductees are the ones which mainly also report seeing strange military personel in facilities their brought too (hoaxes??working with the "bad" aliens).

I won't omit the possibility that what was the government before their tragedies has also traveled over here with their own self-centered plans. In fact its very possible they deliberately contacted our government to get a business deal going. However this isn't the majority of their civilization, and they aren't the only civilization thats involved with us. They are just the most directly involved, making the most contacts. We humans look for physical proof so of course this is the only race we will recognize. The majority of the races do their work by more telepathic means (which most humans aren't aware of at all, let alone ET's that could be influencing

them). The latest letters that were posted at the disclosure project website were from a Canadian investigation organization from the late 50's early 60's whose interviews were just recently uncovered. The paper starts off with an intro of this Ph.D. who started out as a skeptic investigating and soon changed his views and his mind on the subject. It involved finding contactees, channels, or other sources of communication with the ET's and finding out which ones were genuine. It involved asking 100 questions, and the majority of people were either lying or weren't faithfully "transmitting" the messages. However there was a decently large amount out of all the people they interviewed which were genuine and all gave the same answers. They were totally unrelated people from different parts of the country (they did background checks) and all had the same story and answers.

Not only that but they explained science experiments to prove the concepts of alien science which had positive results. They talked about the 12 dimensional model of reality and other stuff. It also talks about the universal law of non-interference, how each entity is to experience their own reality and learn from it and grow on it. It explains how the state of our world is a result of not following that. Basically the benevolent aliens are more involved with studying us and influencing us in an enlightening way through our collective consciousness. This isn't as direct and obvious, so to most people it doesn't exist. What does exist is people being taken out of their beds at night and being tortured. Lt. Col. Tom Bearden talks a lot about the EMP and scalar technology we have. They can basically fake an abduction experience if they want, and this has been going on. That's not even adding in the factor there could be a few selfish ET's who are helping them with this process all the way.

Humans through what we've seen on TV and a couple millennia of warfare have been led to believe the forces of darkness are more prevalent than the forces of light. We believe the only constructive reason a civilization would want to travel here is to divide and conquer, and if the tables were turned we certainly would! If aliens

were to invade they already would have, and it would have been done
and over with along time ago. Don't forget project blue book which
said around 10% of all reported sightings are genuine, and that flying
saucers pose no threat to national security. It's clear what their
intentions are by witness testimony from disclosure project about the
nuclear weapons which were taken. They know our next major evolutionary step is inter-stellar space travel and the last thing
they want is us foolish humans armed to the teeth with nukes flying
around the galaxy. Especially when were paranoid of anything different from us, assuming its evil.

Yea were bad-ass humans. As far as implants and chips go, that sounds a lot more like government shit to me. I believe these abductees are the ones which mainly also report seeing strange military personel in

facilities they brought too (hoaxes??working with the "bad" aliens).

I won't omit the possibility that what was the government before their tragedies has also traveled over here with their own self-centered plans. In fact it's very possible they deliberately contacted our government to get a business deal going. However this isn't the majority of their civilization, and they aren't the only civilization that's involved with us. They are just the most directly involved, making the most contacts. We humans look for physical proof so of course this is the only race we will recognize. The majority of the races do their work by more telepathic means (which most humans aren't aware of at all, let alone ET's that could be influencing them). The latest letters that were posted at the disclosure project website were from a Canadian investigation organization from the late 50's early 60's whose interviews were just recently uncovered. The paper starts off with an intro of this Ph.D. who started out as a skeptic investigating and soon changed his views and his mind on the subject. It involved finding contactees, channels, or other sources of communication with the ET's and finding out which ones were genuine. It involved asking 100 questions, and the majority of people were either lying or weren't faithfully "transmitting" the messages. However there was a decently large amount out of all the people they interviewed which were genuine and all gave the same answers. They were totally unrelated people from different parts of the country (they did background checks) and all had the same story and answers.

Not only that but they explained science experiments to prove the concepts of alien science which had positive results. They talked about the 12 dimensional model of reality and other stuff. It also talks about the universal law of non-interference, how each entity is to experience their own reality and learn from it and grow on it. It explains how the state of our world is a result of not following that. Basically the benevolent aliens are more involved with studying us and influencing us in an enlightening way through our collective

consciousness. This isn't as direct and obvious, so to most people it doesn't exist. What does exist is people being taken out of their beds at night and being tortured. Lt. Col. Tom Bearden talks a lot about the EMP and scalar technology we have. They can basically fake an abduction experience if they want, and this has been going on. That's not even adding in the factor their could be a few selfish ET's who are helping them with this process all the way.

Humans through what we've seen on TV and a couple millennia of warfare have been led to believe the forces of darkness are more prevalent than the forces of light. We believe the only constructive reason a civilization would want to travel here is to divide and conquer, and if the tables were turned we certainly would! If aliens were to invade they already would have, and it would have been done and over with along time ago. Don't forget project blue book which said around 10% of all reported sightings are genuine, and that flying saucers pose no threat to national security. It's clear what their intentions are by witness testimony from disclosure project about the nuclear weapons which were taken. They know our next major evolutionary step is inter-stellar space travel and the last thing they want is us foolish humans armed to the teeth with nukes flying around the galaxy. Especially when were paranoid of anything different from us, assuming its evil.
