Abstract

This study aims to analyze the potential financial distress of industrial sector companies listed on the Indonesia Stock Exchange (IDX) in 2024 using the Altman Z-Score model. The study employed a quantitative approach with a purposive sampling method, resulting in 53 companies selected as samples from 67 industrial sector companies. The variables analyzed included working capital, total assets, retained earnings, EBIT, equity value, and total liabilities. The results indicate that 37 companies (69.81%) were categorized as financially healthy, 6 companies (11.32%) were in the grey area, and 10 companies (18.87%) were identified as being in financial distress, namely INDX, KOBX, VOKS, CAKK, CTHH, IBFN, INTA, KOIN, MDRN, and HOPE. These findings suggest that although the majority of industrial companies maintain adequate financial stability, several companies still face bankruptcy risks that require strategic attention from management.

INTRODUCTION

This document provides a format of guidance for authors in preparing their papers or papers for journal publication. Authors must follow the directions given in this document in order for their paper to be published. You can use this document both as an instruction kit and as a template into which you can type your own text.

This document is a template. Electronic copies can be downloaded from the journal website. For questions regarding paper guidelines, please contact the publication committee as indicated on the journal website. Information on final paper submission is available from the website journal.

Article is written based on the results of empirical research in the form of both quantitative and qualitative research (including using scientific research methods including surveys, case studies, experiments / experiments, and other types of research) with the topic of management economics studies.

This **INTRODUCTION** section explains the main points discussed, which contains research problems, research objectives, and a summary of relevant theoretical studies.

An easy way to comply with journal format requirements is to use this document as a template and simply type your text into it. Your paper should use a page size that fits A4. All documents must be in Times New Roman font.

Title must be in regular font size 14. Author name must be bold in size 11. Author affiliation and email address must be in regular font size 11. Title must be specific and effective, no more than 15 words in English.

To avoid confusion, surnames should be written as the last part of each author's name (eg Ardi Gunardi). Each affiliation must include, at a minimum, the name of the company and the name of the country where the author is from (eg PT Merck Tbk, Indonesia). The author's email address is required.

If there are less than six authors or more, list the names of all authors; not using "et al." Papers that have not been published, even though they have been submitted for publication, should still be declared as

"unpublished", while papers that have been accepted for publication should be referred to as "in press". Use capital letters for the first word in the title of the paper, except for nouns and element symbols.

Figures must be numbered. Figure Captions must be in Regular font size 9. Captions that are one line (for example Figure 2) must be centered while multi-line captions must be justified.

One source of quotations with one author: (Rostiana, 2011). One source of quotes with two authors: (Ridwan and Gunardi, 2013). One source of citations with more than two authors: (Ratnamiasih et. Al., 2013). Two sources of citation by different authors: (Ahmed, 2015; Zarzeski, 2016). Two sources of citation by the same author: (Waddock and Graves, 2017a; Waddock and Graves, 2017b). Sources of quotations originating from the work of an institution are written by stating the acronym of the institution concerned: (IAI, 2012). Source of citations from the website: (Google, 2009).

All hypertext links and bookmarks will be removed from the paper at processing time for publication. The author must include a written statement, if the article written in part or in full has never been published in other journals / proceedings / magazines / newspapers / anthologies / books and or other types of printed works. The article is not being submitted to the editors of other journals. The statement letter form can be downloaded on the Jurnal Rise Bisnis dan Manajemen Journal website or copied from the attachment section.

METHOD

Includes research design, population and sample, development of research instruments, data collection techniques, and data analysis techniques, which are described briefly.

RESULTS

Presenting the results of the final data analysis, not raw data that has not been processed. The results of calculations and statistical / other tests can be displayed in this section, only the calculation results that are important to know are displayed.

Table 1

Top = Bottom = 3cm
Left = Right = 3cm
Header = Footer = 1,25cm
Use a two column format.

Table 2 Font Size for Paper

Font Size	Appearance (in Times New Roman)		
	Regular	Bold	Miring
10	XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX XXXXXX		
12	XXXXXXXXXX XXXXXXXXXX XXXXXXX	XXX XXX XXX XX	XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX XXXXXXX X
12	XXXXXXXXXX XXXXXXXXXX XXXXXXXXXX		XXXXXXXXXX XXXXXXXXXX XXXXXX

	XXXXXXXXXX XXX		
12	XXXXXXXXXX XXX		
14	XXXXXXXXXX XXX		

Figure 1. The Graphics Sample Line should use a contrasting color

DISCUSSION

It is a separate part (not united with the results part). The discussion is an explicit affirmation of the interpretation of the results of data analysis, explains the answers to the research objectives / problem identification, links the findings with previous theory or research (sourced from national and international scientific journals), and the implications of the findings are related to the current situation.

CONCLUSION

A summary description of the discussion of research results, but still refers to the research objectives and hypotheses, not a summary of the results of calculations or statistical testing. Can present findings or what new theory triggers are obtained from the research results.

REFERENCES

It is highly recommended to use standard citation tool (Mendeley, Zetero and others) for Bibliography. Bibliography section headings should not be numbered. Bibliography must contain the entirety of the reference sources referenced in the text. Bibliography or reference list consists of 80% primary references (national and international scientific journals) and 20% secondary references (relevant text books). Bibliography writing follows generally accepted references. Bibliography should be sorted alphabetically according to the author's last name (without academic degree) or the name of the institution with reference to the **APA style**. The arrangement of each bibliography: author name, year of publication, title of article or book name, name of journal or publisher, page number. Journal names should not be abbreviated

Bibliography Example

The bibliography must be written using the APA 7th Edition citation format. Journal articles used should be from the last 5 years at most, and references from books should be from the last 10 years at most.
