Greetings from the CookieRun: Tower of Adventures team.

We would like to extend our heartfelt thanks to everyone for your continued support and love for CookieRun: Tower of Adventures.

To provide a more stable and reliable service, the development team will be making a few changes to how we operate the game and communicate updates going forward.

First, instead of the preview videos previously shared, we will provide faster and more accurate update information through text-based patch notes on the official community. While the schedule for major updates may be adjusted, we will continue introducing new content and improvements so that everyone can keep enjoying their adventures.

We will also continue making balance changes to give existing Cookies more opportunities to shine and offer a wider variety of gameplay experiences.

As the first step, the November 18 update will feature balance overhauls for three existing Cookies instead of introducing a new Cookie. Starting with subsequent updates, new Cookies will once again be released at the same intervals as before, alongside ongoing balance changes for existing Cookies. Further details about these changes will be shared in the relevant patch notes at a later date.

We will continue listening closely to your valuable feedback and doing our utmost to provide a more polished and fulfilling experience.

Thank you.

October 28 Update Notice

Here is a list of changes and additions coming with the October 28 update.
(*All dates and times are based in GMT+9)

COOKIES

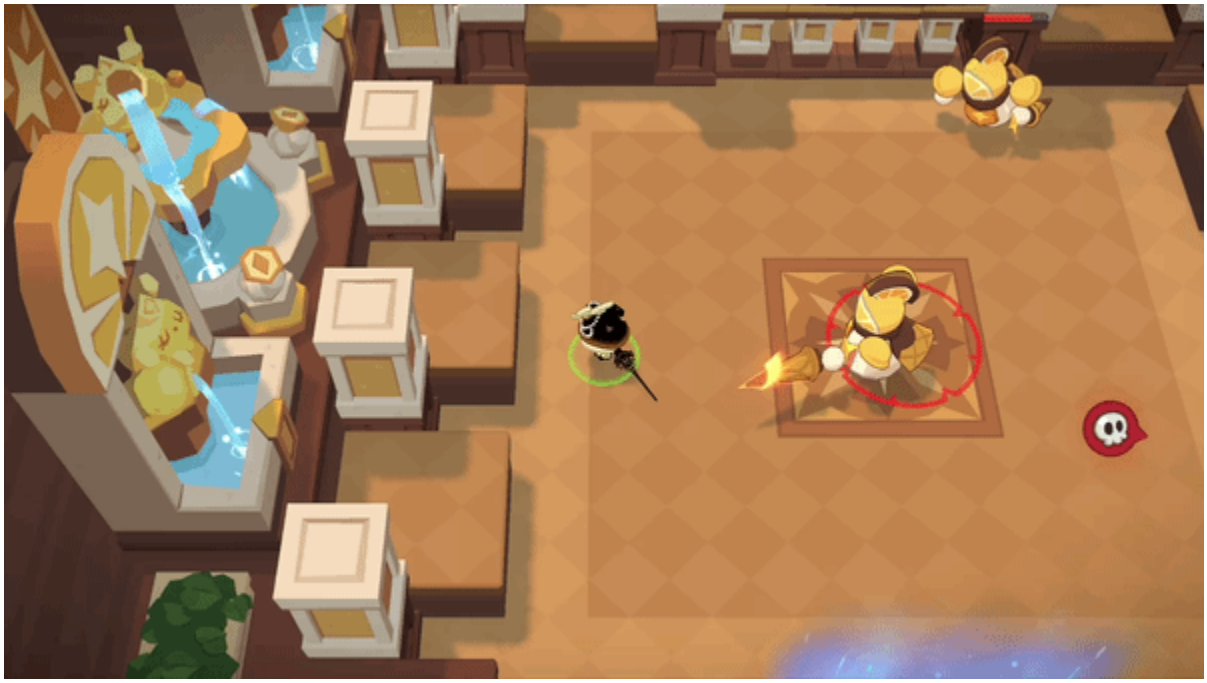

1. Opera Cake Cookie takes center stage beneath the dazzling spotlights!

- Opera Cake Cookie is an EPIC Wind-type Slash Fighter Cookie.

Basic Attack: Uses Diva Mic to attack up to 3 times with Dynamic Groove. After the third hit, the next Basic Attack triggers Fickle Swing. Opera Cake Cookie sings to damage nearby enemies, gaining Ad-lib upon a successful hit. Fickle Swing is treated as Special Skill Damage.

Special Skill: When Opera Cake Cookie uses Syncopated Revelations, a spotlight shines upon enemies within range. Shortly afterward, the Underdog unleashes a hail of bullets into the targeted area with a machine gun.

Ultimate: When Opera Cake Cookie uses Cheerful Double Time, she swiftly closes in on the enemy before performing a dazzling sword dance that cuts across a wide area multiple times. Once the dance ends, she exits the stage and takes a bow. A chandelier then crashes down moments later, dealing massive Damage to enemies within the area.

2. The following improvements have been made to Vinaigrette Cookie.

- Increased the Duration of the Elemental Tags applied by the Self-Replication Ultimate and the Toxic Explosion/Acid Launcher Skills.

- Increased the Damage radius of the close-range explosion from the Self-Replication Ultimate.

3. Added the Summon tag to the Skill description for Stardust Cookie's Star Evolution Ultimate.
