Logline:

Our hero tries to get into Hell by doing bad, but keeps accidentally improving things and drifting closer to Heaven instead.

Synopsis:

The main character ends up with the ability to see people's Sin Scores, after a fateful encounter with a particular individual.

After this they set out with the goal to get into Hell. The only the problem is that they don't really want to do anything to bad or illegal.

So they try to do small things to lower there score with the goal of dying with a high enough Sin Score to enter Hell. However, they seem to keep accidentally ending up making things better for others and having their Sin Score lower.

Will they be able to get into Hell when they keep bumbling their way into helping?

And why is it they even want in there in the first place?
