LOW-LEVEL FESTIVAL RETURNS TO BROOKLYN

Second iteration includes two days of retro-futuristic music, art & interactive work.

BROOKLYN, NY -- Low-Level Festival will take place on **August 19-20 of 2016** at **The Muse** (250 Moffat, 11237), a beautiful brick warehouse space specializing in dance and circus arts. This year's unique event will bring together 14 live musical and visual performances, large scale installations and game cabinets from Death by Audio Arcade.

Death by Audio Arcade +
Line Wobbler
Super Russian Roulette +
VEC9 +

Performers vary in their styles, sounds, and philosophy, but are loosely bound by their connections to digital media as it has transformed over recent history. Whether it's lo-bit music repurposing ancient computers, synthesized sounds recalling the pop styles of the 80's, or heavily remixed and sampled audio inspired by internet culture, we believe these represented works all hint at how time itself is becoming a movement.

Tickets are available for purchase online at http://lwlvl16.brownpapertickets.com
Schedule and artists are subject to change.

> **$55.00 *Festival Pass*** - Two day pass, all mainstage performances, arcade and exhibits. Includes Saturday daytime gallery admission.
>
> **$30.00 *Day Pass*** - Single day ticket for Friday or Saturday to all mainstage performances, arcade and exhibits.

The production team brings collective experience from Blip Festival, Kick*Snare, Control-Flow, Pulsewave and other New York arts events.

lo-bit music refers to a number of aesthetic and / or technical aspects of many, though not all, of the artists being presented. The title relates both the minimalism that is at times on display, with the 1's and 0's (lo) implicitly underlying digital technology. Generations that were born with or raised by the computer revolution are working now to redefine their relationships with the machines that are changing the world.
