

Moy's Statement

My name is Moy Valdez, I am a transfer student at USC trying to make the best of my university experience by engaging in student government and running for Student Senate. I have previous experience working in the United States Senate, the California State Senate, and being President of my student body when I was a student in the CSU. Experience, while new to USC, is something that I possess in all fields of government which I feel can aid the average student attending USC. Together, lets shake up the establishment and offer some experienced representation!

Moy's Platform

I am running on 3 fundamental points that I believe would aid all students at USC. My first point is to engage more students in the Undergraduate Student Government so that way we have more representation of the student body. As it stands, only a select few know or even participate in USG, this must change if we hope to grow diversity, representation, and increase the impact that the organization has on campus. Furthermore, students should be exposed to student government and its perks from the moment they are admitted to USC, even advertising it as a fundamental part of the student experience on campus.

Second, I hope to work with University Administration to find more ways to provide resources and financial support to USC students, especially newly admitted students and transfer students. Often, it can be hectic to traverse through the many websites, forms, and third-party institutions just to receive aid for finances or basic needs support. I would like to work with the university to make the process of finding resources simpler as well as provide more resources to newly admitted students so that way they can start right away getting the help they need. In addition, I would want to work with the administration to create a University Grant for voting in USG elections, tying it to a scholarship/award that can save students some crucial money while encouraging them to participate in the democratic process.

Finally, my last point is to further support student-led organizations on campus, building more bridges between the student government and student organizations as they are a vital part of the student

experience. Creating a way for students to get involved on campus, while also being members of student government, would serve to better represent both students and organizations on campus.
