SUMMARY

Developer Advocate & Community Evangelist with 3.5+ years of experience in engaging and supporting developers & open-source communities. Skilled in fostering healthy developer ecosystems by driving discussions, answering questions, curating resources, and facilitating feedback loops across **forums, GitHub, Discord, Slack, and Reddit**. Creating **POCs** for tech products with global teams & **fast-paced** environments. Experienced in bridging Product, Engineering, and Support teams with community insights to **scale adoption of APIs, SDKs**, and developer tooling. Adept at creating community-driven learning resources, running technical content campaigns, and enabling contributors to succeed. Strong foundation in **APIs, sample apps, SDKs**, and their documentation with a commitment to improving **developer and tester experiences**. 4+ years in technical writing, open-source blogs on developer guides & practices. Passionate about **delivering talks & presentations** & also catering to developer voices via **internal & external DevRel**.

PROFESSIONAL EXPERIENCE

SuprSend, *Developer Relations Engineer & API Product*

Feb 2025 - July 2025

- Revamped & migrated legacy documentation to **Mintlify** - in which I integrated **Mixpanel & Google Analytics** tools for analysis, thereby increasing **2.5x user retention**.
- Maintained **SDKs** in Python, JavaScript, and React to streamline notification integration, cutting setup time by **50%**.
- Implemented a **Docs-as-Code** workflow with Git, Markdown, Vale-linting, & GitHub Actions for a consistent workflow.
- Regular **changelog** pushes, published **advanced use cases** (batching, dynamic triggers), using **Postman, Swagger UI, pb33f** drafting implementation guide.
- Scaled and managed the Slack community with a **1.7x user growth** in 2 months; facilitated internal **ticket** assignments and maintained a **feedback loop** by **logging** user issues.

Keptloy, *Developer Relations Engineer*

Bengaluru, Oct 2024- Jan 2025

- **Debugged & Generated** unit tests for **sample apps** (Python, TypeScript), improving test coverage to **96%** ([GitHub](#))
- Refactored company **SEO** guidelines using Semrush & Backlinko. **Published** DevRel content on **CI pipelines & testing**.
- Planned, onboarded, & led **Writer's Program** — weekly syncs, documentation, community & program **management**.
- Pitched & represented Keptloy in offline **events**, hackathon booths, & guest blogs, **hosted** [DevScribe](#) with Google's DevRel Team at Bengaluru Office.
- Pitched & Promoted new **VS Code extension** via offline event collaborations, hackathon booth demos, guest blogs, driving **500+ downloads** in 3 days, and **trending** on the Microsoft Marketplace for a week.
