

"How well do you know our favorite furry companion? Did they really descend from wolves? What's the difference between a Chihuahua and a Saint Bernard? And just how smart are they? Join one friendly mutt on a journey to discover the secret origin of dogs, how genetics and evolution shape species, and where in the world his favorite ball bounced off to." (Amazon Summary)

Mrs. Petrin's Review ★ ★ ★ ★

Packed full of facts about how dogs originated from the wild, were domesticated, developed various traits, strengthened certain characteristics based on their jobs and much more. Facts are shared in an interesting manner and in such a way that upper elementary and middle school students should be able to understand the science behind it. A very comprehensive volume, in graphic novel form, for kids who want to learn more of the science behind their favorite pet.
