Dweebs Commission info

(last updated 21/oct/2025)

Status: **Open!**

hello and thank you for looking into my commissions!

Please read through this form and pick the order of your desired commission! If you have any questions feel free to ask them when we talk about details in dms.

General info:

Payment:

I take **PayPal**, **CashApp**, **Venmo**, more to come, if there is a type of payment not listed and you think should be there let me know

I ask for half or all of the payment midway through the commission so that neither of us run off with the goods.

Contact:

I can be contacted via various methods, if you can't dm me on the social platform you found me on. I work best with constant contact so I can check if I'm portraying characters right and making sure you are happy with your product

email: fcfennellmedia@gmail.com

discord(preferred): dweebster

Posting commissions:

I like to post commissions I do for advertisement of my services and also I'm proud of the work I make. I will ALWAYS ask you, the client, beforehand and you have the right to say if you want your commission posted or not, you can also remain anonymous/untagged in the post if you wish.

Art Programs:

I Prefer to use Blender (grease pencil) to do commissions, I can also use Krita or magma if you would prefer that- this doesn't impact price.

Wills and Wonts

Will do:

- furies
- robots
- LGBTQ+

- fan art
- ship art
- horror
- sonas
- gore/heavy gore
- NSFW (MUST be over 18)
- NSFW (weird fetishes, check with me first if you're unsure and Must be over 18)

Won't do:

- Incest
- Pedophilia (loli or shota)
- Beastiality (zoophilia)
- hate speech
- political stuff

Something not here? Ask!

Rules

- No NSFW for anyone under 18
- if you are rude i can refuse to serve you (refund will be given, I'm not evil)
- Pretty please do not change your request super late in development (big changes like adding a whole other character while i'm in the coloring phase)
- Have your money ready before you commission, especially if you're choosing something that i can do very fast, i would prefer not waiting to get paid after i finished my job.
- Remember! You are in control, if there is something you don't like don't be afraid to tell me!
- You may edit my art or have someone else edit my art once you receive it, I ask that you show me but only because I'm nosey!

Feel free to ask for specific coloring/line-art styles, you can use my pieces as an example for what you want but i can also try and emulate a style

Basic Explanations

Sketch 10\$

a rough sketch of whatever you want, it can include backgrounds/props/extra characters free of charge, it won't be colored but you can choose colors of the sketch lines and background color

Lined 20\$

(not recommended) basic line art of whatever you want, including a sketch to be lined, you can choose the color of the lines as well as the background color. I can also make it transparent and fill in the art so you can still see the art when on a dark background.

Partial color 25\$

Lined piece with minimal coloring.

Flat color 30\$

line art and full color. you can choose to add a background that consists of simple patterns and colors or choose to leave it one color/transparent. This includes colored lineart!

Color + Shading 45\$

Clean line art, full color, and basic shading. You can choose to have the shading be cell or softer as well as the intensity of the shadows. You may also choose a simple background or transparent similar to clean color

More than 2 characters

Each additional character will cost 5\$ each (can be debatable, multiple heads/faces with different personalities, if a character is wearing another, etc)

Background/environment

More complex backgrounds or backgrounds that I blend into the foreground will cost 8\$ more
Examples: place that needs to be defined, characters in a car/diner booth, etc.

Alts

Alternate versions of the same piece, Example: a version with a blue shirt and one with a red shirt.

Note: Alts are not a separate piece, they are an extension of the base piece

Note 2: alts are not offered for any animated piece.

Special Explanations

Custom character 40\$ (simple) 60\$ (full)

A full character design from me to fit your needs, good to get ideas out if you struggle to draw them yourself, you tell me what you want the character to be, i can also help with some design features but you are in full control at all times, for both options i will include as many concept sketches as you need as well as design advice if you want/need it, i will send you all sketches and you will have ownership of them.

Simple would be a single full body piece of the designed character as well as a couple extras (ie emotions, closeups of details, etc)

A Full Custom character would include two full body drawings of the designed character as well as extras.

Character ref 40\$ (simple) or 60\$ (full)

reference image of a character, can be an oc, sona, or headcanon version of a pre-existing character. Quality of the ref can be flat color or shaded, does not affect price.

A simple ref would include one full body drawing of the character as well as extras or details (ie emotions, closeups of details, etc)

A full ref would include multiple full body drawings, ideally front, side and back (or other outfits) as well as extras.

Screenshot/image edits 15\$ (Krita or magma only)

I edit an image of your choosing either for simple changes or full additions You must provide the image, I work best with art/cartoons. If you don't own an Oc, photo, or piece of art please ask permission of whoever owns them, if it's a character from a show/book/public piece of media this is not necessary.

Profile picture 10\$

1000x1000 digital art piece perfect for a pfp. I'd suggest the subject be a headshot of a character but it can be anything you'd like. Good budget option

Very short sketch animation 30\$ (Blender only) (Experimental)

I am NOT good at these, therefore the price, I do think I can still do them consistently.

Animations can be 10 second or less, better for a quick demonstration of movement or a gif

Short animatic 20\$ (done in Blender 2D) (Very Experimental)

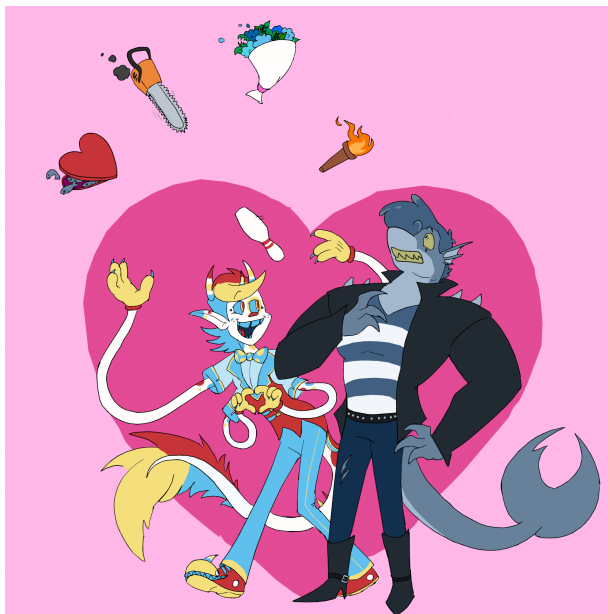

similar to the sketchy animation, I am NOT good at these yet. These are best for a jokey post or maybe a teeny tiny AMV, if you'd like one of these you would have to provide the audio yourself

If you have any feedback for this doc let me know! My goal with this doc is to have it be as understandable and accessible for anyone who wants to commission me so any advice is welcome!
