ABSTRACT

ABSTRACT IN ENGLISH text text text text text text text text text text text text text text text text text text text

Abstract of the Full Paper should be condensed further and not to exceed 200 words in length, paragraph justified. The abstract should summarize the main points of the article.

The abstract must be written in both Indonesian and English, ***with no more than 200 words****, in a justified paragraph, with 1 space.*
The abstract must include ***the research focus, urgency, method (procedures, variables, data collection and analysis techniques, etc.), and the results obtained.*** *[Cambria 10]*

ABSTRAK IN BAHASA INDONESIA text text text text text text text text text text text text text text text text text text text text text text

1. Introduction [Cambria 12 Bold]

[Blank 12]

This section explains the **background of the research or study, its focus and problems, urgency,** and **novelty**. A good article should convince readers of the importance and novelty of the research.

Authors are responsible for their writing, including references/citations and compliance with the ethics of using others' work. Accepted articles **must not have been previously published**. All articles must be submitted in **Word Document** format. Manuscripts should be **no longer than 15 pages**, 3,000–4,000 words. Authors must sign and attach a **Declaration Form** regarding the originality of the article, confirming it has not been published and is not under review elsewhere.

RUAS Journal publishes articles in English. If the article is written in Indonesian, translation will be done after it is deemed acceptable. Translation costs are the author's responsibility. Articles will go through proofreading for writing and

grammatical improvements. Plagiarism will be checked using **iThenticate**. If plagiarism exceeds the allowed threshold (maximum 25%), the article will not be published, and any previously issued **Letter of Acceptance (LoA) will be cancelled**.

All articles will go through a review process. Authors must revise their articles based on reviewers' feedback until they are declared suitable for publication. **The review and revision process may occur more than once until acceptance** and issuance of the Letter of Acceptance. If authors fail to submit revisions within the specified deadline, the review process will stop, the LoA will be automatically cancelled and deemed invalid, and the article will be **REJECTED**.

[Blank 12]

2. Materials and Methods [Cambria 12 Bold]

[Blank 12]

This section explains the theories underpinning the research or study. Use theories that help answer the research problems and elaborate on them according to the research focus. It is highly recommended to use research results from the last 5–10 years from **reputable scientific journals (indexed in Scopus/WoS) or journals accredited by the Ministry of Education and Culture (Sinta-accredited).**

This section should also describe the research method used, research stages, variables/units of observation and analysis, data collection methods, analysis and measurement techniques, data synthesis to find relationships between variables, units of analysis, etc. Describe the methods and steps concisely yet clearly. Use tables and diagrams if needed to clarify the explanation.

Authors **MUST use Mendeley** as reference management software. All cited references must be listed in the References section. Use relevant and up-to-date sources (at least 80% from scientific journal articles published in the last 10 years). Minimum 25 references are required. **Sources such as theses, blogs, online newspapers, social media, or other internet content of unclear scientific value are not allowed.**

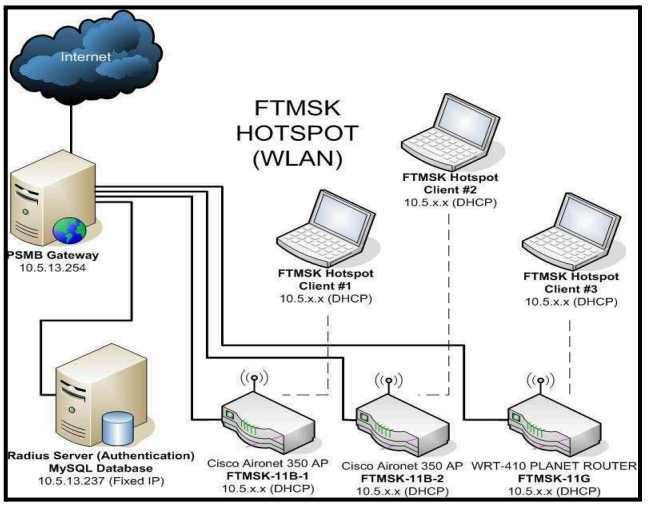

[Blank 12]

2.1.1 Images and Tables [sub sub heading: italics, *Cambria 12*]

[Blank 12]

Images/diagrams should not exceed 50% of the entire article content. **Use good resolution images (1200 dpi for line art, 600 dpi for grayscale, and 300 dpi for color, at correct size; formats JPEG/JPG/GIF)** and **easily readable fonts**. Each image must be numbered sequentially with a clear title. Adjust the position of images and tables to match the content. The font used for image and table titles must match the article text. Cite the source below the image title (author, year or documentation owner, year) using Cambria 10 font. Leave one blank line before and after the image. Images should be set as In Line with Text.

[Blank 12]

[Blank 12]

[Cambria 12]Figure 1. FTMSK Hotspot Structure (Image centered on page)

[Cambria 10] (Source: name, year)

[Blank 12]

If the table is from another source, cite the source in the bottom left corner of the table. Include it as one of the references at the end of the article.

[Blank 12]

Tabel 1. Performance of OSB (Table centered on page) [Cambria 12 Bold]

OSB/1: General purpose	EN 310: 1994	EN 310: 1994	EN 319: 1994	EN 310: 1994
Minimum requirement	18MPa	2500MPa	0.28MPa	25%
Treatment: 600/5%	MOR/Major	MOE/Major	IB	T/S
Minimum requirement	18MPa	2500MPa	0.28MPa	25%
Treatment: 600/5%	MOR/Major	MOE/Major	IB	T/S

[Cambria10](Source: Analysis result, year)

Each table should have a title and be sequentially numbered. Avoid using color unless necessary to aid readability. **Table borders should only appear as horizontal lines at the top and bottom of the table header and at the end of the table.** If the table contains detailed data requiring sub-headings, use bold lines at the end of sub-headings, as in Table 2.

Tabel 2. Performance of OSB (Table centered on page) [Cambria 12 Bold]

No	Building Name	Composition	Proportion	Dimension	Axis
A	xxxxxxxxxx 1. Xxxxxxxxx 2. yyyyyyyyyyyyy				
B	wwwwwwwwwww 1. aaaaaaaa 2. bbbbbbbb				
C	xyxyxyxyxyxyxyxy				

1. abababababa
2. cdcdcdcdcdcd
3. ghghghghghgh

[Cambria10](Source: Analysis result, year)

[Blank 12]

3. Results and Discussion [Cambria 12 Bold]

[Blank 12]

Explain the results of the research conducted. Discuss these results with theories and previous research findings. Results and Discussion should address the research problems while also explaining the benefits and novelty of the findings.

Follow this article format carefully. The text must be written in single-column format, with **margins of 2 cm top, 3 cm bottom, 3 cm left, and 2 cm right**. Use **Cambria pt 12** font**,** multiple spacing at 1.15, and justified alignment. The first line of each paragraph should be indented with one tab (1.25 cm). **Manuscripts should not exceed 12 pages (including References)**. Do not change the font size or line spacing, and avoid using headers, footers, and footnotes. Headings and subheadings must be preceded by a single blank line. Place supporting images and tables in appendices, especially if they are numerous or large, to help readers understand the content better. Remember to number and caption all images and tables, including image numbers and titles, sources, and tables.

[Blank 12]

4. Conclusion [Cambria 12 Bold]

[Blank 12]

Submit the paper in **Word Document format** via the Open Journal System at **ruas.ub.ac.id**.

[Blank 12]

Acknowledgement [Cambria 12 Bold]

[Blank 12]

An **acknowledgement** section serves to recognize specific individuals and entities supporting the study. This includes authors, non-author contributors (such as advisors, peers, or technical staff), financial sponsors, and editorial assistants. All listed details must remain concise, highlighting only those who offered direct assistance to the investigation. An acknowledgement is especially needed for **articles resulting from research grants**.

[Blank 12]

Author Contribution

This section details the individual contributions of every collaborator within a single concise paragraph. Specify each contributor's full name alongside their distinct responsibilities throughout the investigation. For instance:

Author1 together with Author2 formulated the underlying concepts. Author1 and Author2 established the conceptual framework and executed calculations. Author3 along

with Author4 evaluated the analytical procedures and directed the study outcomes. Every contributor deliberated on the findings and helped refine the final manuscript.

[Blank 12]

Declaration of AI Use

The AI declaration must disclose whether AI tools were used in the research or manuscript preparation. If used, authors must specify the tool and version, its purpose, and how the outputs were verified and revised. Authors remain responsible for the manuscript's accuracy, originality, and integrity. If no AI tools were used, this must be explicitly stated.

[Blank 12]

References [Cambria 12 Bold]

[Blank 12]

Write the reference list in **APA style**. Use **at least 25 references** for each article, with at least 80% coming from **scientific journal articles published in the last 10 years. (it is recommended to prioritize references published within the last five years). Use MENDELEY so references can be automatically** inserted to match the in-text citations.
