

=====ParaNet Alpha UFO Reports =====The Mutual UFO Network is reporting several areas of increased UFO activity around the country and in Australia. In the case Down Under, Walt Andrus reports that a lady and her two sons were driving from Perth to Melbourne at about 2:45AM Wednesday when they spotted a craft shaped like an "egg-cup" through their rear window. The object overtook the car, and according to the occupants, the entire vehicle was lifted into the air, shaken violently, then dropped back onto the road, causing damage and a blown tire. The claimants reported that their voices seemed oddly distorted and "slowed down" during the encounter. They also reported a residue of a powdery gray substance seemed to have been deposited on the car. There were several independent witnesses to a UFO in the same general area in the same time frame, including two men on a fishing trawler 50 miles away. Initial news dispatches have it that the fishermen experienced the same vocal distortion; however, Andrus was hesitant on that point, saying that it's possible the news service was confused regarding its facts. He said that two MUFON investigators are on the case, Keith Basterfield and Bill Chalker. He confirmed that the grey powder is being analyzed. [Hot tip from Your Administrator: We will be very interested if the stuff turns out to be Magnesium Oxide.] Back in this country, a UFO seems to be buzzing the town of Gulf Breezes in the Florida Panhandle. Andrus, who spent four days in the Pensacola suburb at the request of MUFON State Director Donald Ware, reports that a gentleman who wishes to remain anonymous has taken 16 "amazingly clear and detailed" polaroid photos of the object, as well as a Beta videotape. The object is reportedly of the classic disk variety. Adding to the mystery, another anonymous photographer sent his entire 35mm camera to a newspaper with undeveloped film inside. When developed, the film showed the same object. Andrus says that efforts are being made to coax the photographer out of the closet. He acknowledged that it could be the

s
ame chap as the one who took the polaroids, but adds that there
are several other independent witnesses to the sightings. Other
hotspots whi
c
h seem to be flaring up include the Texarkana, Arkansas, area,
and parts of Michigan, Georgia, and (shades of NIGHT SIEGE), the
Hudson Vall
e
y. No one is declaring a UFO flap at this stage, however, that
may be partially due to caution by local MUFON investigators not
to muddy th
e
waters with "copycat" reports. ParaNet will continue to keep you
apprised of developments. Watch this column for further
information and up
d
ates.

THE PASTURING AND USE OF HOMO SAPIENS
by TAL Levesque

My late friend, Richard Shaver, told me that asking
"officialdom" for
action about UFO data is like a Jew asking Hitler for mercy on
the grounds
that you have a family to care for. The storm troopers reaction
is to go
out and pick up the rest of
the family. Most UFO buffs think that their efforts will lead to
some
sensible attention by the powers that be, attention to the broad
problem
that UFOs present ... the problem of "are they invaders?", "what
do they
want here on Earth?" and all those
other nagging questions. They come to Earth for things surface
poeple
don't know about. Earth is on the ancient space trade routes.
They come to
bases (cavern city complexes) and they mine, manufacture and some
do
genetic manipulations to form var
ious subservient cross-breeds.
For the most part, we are dealing with another species,
humanoid in
shape but reptilian in heritage. Their leader-elite are the
"Draco". They
are cold-blooded and have to balance their surrounding
environment to
maintain body temperature. They are
suited especially for space travel, as they have the ability to
hibernate.

The "reptoids" have scales which protect them from losing moisture through their skins. They have no sweat glands. The scales are much larger on their backs, making the skin more waterproof. The scales on their face, neck, chest, and hands are smaller and more flexible. They have three fingers, with an opposing thumb. All have large cat-like eyes and twin noseholes at the end of a short, stubby muzzle.

They are mostly meat-eaters. Their mouth is more like a slit, but they have teeth differentiated into incisors, canines and molars. They average six to seven feet tall. These reptilian beings direct the efforts being called the GREYS, EBES, etc., and form the largest category likely to be encountered by surface humans.

They are really an order of "cross-breed" between Homo-Sapien and the

reptilian species. There are several other lines of "cross-breeds" which

have been bred for various characteristics. Some even appear more or less human. Some of the reptilians and

cross-breeds have sensory pits (near the eyes) that act as an extra sense

and can "see" heat. Some have a pineal eye and are telepathic. These beings

can operate effectively i

n the dark. Their eyes are more sensitive to ultra-violet light. They can

control their heartbeat. The greys have a high metallic content

in the skin, as well as an unusual cobalt pigmentation. Many have no

external sex organs, but some have been bred

to have them. Government authorities; agents disguised as

civilians and others seek to learn more about these beings. It should be noted

that not all the cross-breeds are hostile. There is an order of small

humanoids (2-4 feet tall) that work with

the beings that resemble humans, except close examination will

reveal unusually shaped ears. The most prevalent of these have blond

hair, large foreheads, and a medium dark or light complexion. The reptilian

cross-breeds are potentially dangerous. On

e variety (working with the "Draco") has come from a system with

a light source that subjected them to a high level of radiation. It is

the minds of

these beings that would be considered most strange by terrestrial standards. They are hive-like (robotic) and demented. They are considered detrimental beings (DEROS). These beings do not eat (as we know the term). Some use substances that are synthetically produced, mixed with blood from living animals and humans. This is sometimes mixed with hydrogen peroxide, which kills the foreign bacteria in the mixture. They may also be feeding off the "life essence" of these substances. They also seem to "feed" off nuclear energy, and have apparently manipulated humans into developing sources of radioactive power.

It appears that there are several groups of interlopers active on this planet. I want to focus on the "Men in Black". These elusive figures are a distinct part of the UFO scene. They are based deep underground. They seem to use extra-sensory or technical means to locate and check up on humans to have spotted their flying craft or know too much about their activities.

They seem to be kind of a "security force". The pallor of their skin and their sensitivity to light suggest that they come from an environment with subdued light. Their movements and apparent pain while on the Earth's surface suggest that they live in an area with less gravity field density. Apparently, they are assigned to cover up the activities and secret operations of their civilization. We must actively resist the "invaders" of our Planet, our bodies and our minds. We must expose the enemy which seeks to enslave us. We have a sacred responsibility...based in truth, reality, and HOPE.
