

Name: _____

How do your muscles, bones and joints work together as a system?

Create a presentation that answers this question. You can use ANY presentation tool that we have used already this year. You can write your ideas on the back, too! Use this rubric as a guideline:

Criteria	Points Available	Points Earned
Complete: Bones/Skeleton I explained how our skeleton/bones works in our body.	2	
Complete: Joints I explained how our joints work in our body.	2	
Complete: Muscles I explained how our muscles work in our body.	2	
Vocabulary: I used at least 6 Science vocabulary words from the word bank.	6	
Spelling/Grammar/Punctuation It follows the grammar and punctuation rules we have learned. Everything is spelled correctly. (IF YOU'RE TYPING)	6 (2 each)	
Clarity – My presentation is clear and easy to understand. I used full sentences. I have practiced before I recorded. (IF YOU'RE SPEAKING)	3	
Quality – It shows that I took my time. It is easy to understand. It shows I have learned about the human body. It is clear I understand how the parts work together.	4	
Total:	25	

Good Vocabulary to Use:

skeleton
torso
bones
skull

joint
immobilize
cartilage
opposable thumb
articulated

muscle
tendon
tissue
contract
