The decision for this move is made not just to encourage readers to legally support Meatbun for the commercial work she has done, we also hope to foster a group that respects the original author as well as our translation.

There seems to be the belief that once our work is released to the public domain that it no longer belongs to us, that anyone is freely entitled to it. The amount of toxicity we received and the number of eager snipers ready to run away with our work is inexcusable. The creation of the advanced group is not an attack on anyone without means and the 21+ age restriction is not about what is deemed age-appropriate for the novel. This is about creating a space of mature readers who appreciate the value we bring, and our fight against the aforementioned entitlement. Rynn and I are only here for a good time for ourselves, and we want to keep it that way. No one is forced to join this group.

At this time, all updates will be on Twitter only. The age restriction is non-negotiable.

If you have questions NOT already covered here, my DM on Twitter is open.
