

How to plug in my Cisco 7945/7965 Phone?

1. The first cable goes from Cisco 7841 Network Port (shown below) to jack in the wall or jack in network switch

2. The second cable goes from the Cisco 7841 Access Port (shown below) to the network port on the computer or laptop

3. If you have connected the phone correctly, you will see the phone screen power up and eventually display your phone number. You can also watch this video and see how to connect you Cisco 7841/8861 [VIDEO](#)
