

When requesting support, it helps us help you if we know what revision of hardware we are troubleshooting.

There have been a total of 1 revisions on all PCBs sold as products.

If you are buying the first iteration of the again Silver System, you have narrow rectangle rev2.1 and circle PCB rev2

Wide rectangle rev1

Applications:

- Prototyping only, not for sale

Narrow Rectangle rev1

Applications:

- Hanging pods
- Early remotes
- Not used in production

How to check:

Narrow Rectangle rev2

Applications:

- Hanging pods
- LED strip kits
- Aluminum light bars
- LED projector

How to check:

- Look for the again logo near the top of the board, below the radio module
- Look for the curved power trace near the power socket, on the back of the PCB.

Narrow Rectangle rev2.1

Applications:

- Hanging pods
- LED strip kits
- Aluminum light bars
- LED projector

How to check:

- The pcb is identical to rev2 but has a dangling power converter hanging off the board with several knife cuts through traces on the motherboard.

Circle PCB rev1

Applications:

- Knob remote
- Curve lamp

How to check:

- Has two again logos, one on the front, one on the back
