Number : 46
Plant : purple hyacinth
Smells : smoke, sandalwood, amber
Gemstone : Apache Tears
Element : air
Weapon : gilded crossbow

HEADCANONS

- their appearance is similar to that of angels, in stature mainly
- they went to go searching for ways to find out why they existed, why the virus targeted their planet and this lead to a ton of research and exploration by Akui
 - exploring the universe, they had the means to do by buying a ship from Nephys' ports
- they became a cosmologist after a few years out in space, noting down different stars and planets, and thoroughly researching,
- parasitology is part of their existing expertise, fitting in their medical knowledge - as to why they chose this career was due to a few incidents of parasites causing a little too much trouble and akui wanted to rid of them or how best to work with them
 - what defines a parasite : a creature that feeds of a being and these that developed on Nephys affected the mind, creating delusions and violent tendencies
-

FACTS

- the interstellar library is a collection of books on everything and anything and can be found in hell and above, containing every one inside (it is a single book that upon opening , leads to a dimension of the library itself)
- contracts are possible, details to be added

DEMONS :

a mutated species from akui's planet
where did the mutation come from?

The heart mutation originated from [REDACTED] wings falling off, claws developing, blood need, ill for first week

effects of not intaking blood : mindset deteriorates, losing control over impulses

(rarely does akui go through this though, they have a decent supply of it on hand at all times from "hunts" aka searching for those who deserve death and deriving their blood)

The virus itself is not just a virus, it is a biological rewriting of an angels dna to become a demon ,an ancient subspecies that existed long ago

A sample of one of their leaders was taken shortly after eradication and had been saved

● ABILITIES:

- Shadow manipulation
- Stealth
- Blood work
- Mimicking

WORLD:

- two suns
- "Heaven" is the main planet of the system
- Nephys has a rich economy, trade efficient and has well established connections to outer worlds
 - the planet itself is a subsect of the Heavenly Galaxy, where 5 other planets exist with their own angelic peoples (all of differing types like seraphim, the one which akui resided)
- euphratys : ruler over the heavenly galaxy, cause the asteroid to hit akuis planet (nephys) as an "experiment", faceclaim is pompey from zzz
 - Sort of like God in abrahamic religions
- lore : one of the fates, keeper of the library & right hand of euphratys
- Hayami being a ruler over Nephys, lovers with Akui
- the meteor did not directly hit the planet, rather it burned in the atmosphere, and chunks hit the planet with little impact (still carrying the virus)
- the ruler previously had committed the atrocity of eliminating the demons from their worlds, so they thought but euphratys, with help from lore, extracted His brother's blood and created the virus out of it, though it got stolen and mysteriously, cases of demons began to crop up on the planet akui lived on

SOLOS:

(WIP)  FIRST EXPLORATION : AKUI'S DIARY #1
