Describe

1. How would I describe the work?

A work incorporating the night from "Starry Night," with a bird sitting atop a branch with berries in front of a city. The bird seems to be looking up at the stars in the sky.

Analyze

1. In what ways does the art illustrate various [Elements of Art & Principles of Design](#)?

Three examples this artwork illustrates is color, texture, and value. The leaves have a distinct texture apart from the bird, sky, houses, and ground. The color scheme works well together, with almost

	complimentary colors that makes the yellow pop. Different values of the same color can be seen in the sky with the blue, and yellow stars.

As I said above, this work expresses a serene and calm emotion, mainly because of the blue (seems like a quiet, beautiful night).	There is absolutely nothing I would change about this work. It's a very dynamic painting that catches your eye wherever you look. The color scheme and craftsmanship are both amazing and are what makes the painting so great. I really love the texture of the leaves; it feels like I could reach out and feel them.
