Hi, Musician, Artist, Creative, Friend!

Your talent, skill, and experience are the foundation of your portfolio career. Your work ethic is the reason for your growth and expansion. And your mission and your will to succeed are the fuel behind your success. You are amazing!

The PROBLEM is that the next stage of your career involves a project that you just can't seem to make time for. Maybe that's a new website, a book, a new curriculum, a new income stream. It might not even be quite clear yet what the project IS - because you can't seem to make time to even think about it!

But a project like this IS what moves your career forward! Do you want to be stuck in the same busy, "successful" grind in 5 years? Or lean toward the big ideas that are in your heart?

I see you. I have been you. And I can help you!

About me: I have been a successful musician entrepreneur for decades. I have a career made up of all the things that I love most to do, and I'm well paid for them. I perform both in the orchestra and as a soloist, I teach but only in groups because that's what I like, I podcast and make videos because I love talking to people and sharing my expertise, I published my own book and produced my own album. I have built multiple six-figure businesses around doing just the work I love to do, and I deeply enjoy coaching ambitious musical visionaries just like you.

THIS SUMMER, join me and a group of your talented, inspiring, successful, BUSY colleagues to get your new project moving. **The Happiest Musician Incubator** is designed to give you inspiration, accountability, support, cheerleading, and TIME to focus on your project!

FIRST, we'll stabilize your existing activities. What to keep, what to grow, what to stop doing? How can we systematize your current activities to create the money you need in less time?

THEN, we look at breaking down your new project into achievable steps.

- We'll explore the possibilities of your project and make your vision VIBRANT.
- We'll right-size the first milestone to the time you actually have.
- We'll get that process broken down so you actually KNOW what to do.

We'll have a few supported sessions here for actual implementation - group coaching and body doubling on zoom.

THEN - a plan ahead session to look at your fall schedules and where this project's continuation is going to fit.

Specifically:
Over three months (June through August) we will:

- Meet for **5 interactive group sessions** to guide your journey and learn some new perspectives and tools to integrate immediately
- Come together for **4 office hours/dedicated work sessions** where you can get coached on the questions coming up on your own journey.
- Have a **voxer group the whole time** for celebrations and support
- Be in (optional) **peer partnerships** with other participants for dedicated thinking time
- And… you'll have **2 60-minute private coaching sessions** with me.

$960. Payment plans are available.

VIP BONUS: We start in June, but as soon as you enroll I will schedule you for a **pre-program 1:1 session**, AND open a **voxer channel** for between-sessions support - so you can get GOING on your new project right away!

Questions? Ready to enroll? Email me at Jennet@Jennetingle.com, or you can hop straight into my payment portal.
