Version log

Ver	Date	Applied Server	Compatible DHIS Version	Details
v 1.68.	2021, Dec 13	data.psi-mis.org	2.36	<ul style="list-style-type: none"> • Upload on production server
v 1.68.5	2021, Nov 23	https://236 data.psi-mis.org/	2.36	<ul style="list-style-type: none"> • Cannot save data values of an event.
v 1.68.5	2021, Nov 10	https://236 data.psi-mis.org/		<ul style="list-style-type: none"> • Upload on this server for testing with DHIS 2.36
v 1.68.5	2020, Jun 22	data.psi-mis.org/	2.33.4	
v 1.68.4 SNAPSH OT 9	2020, Apr 21	new.psi-mis.org	2.33.3	<ul style="list-style-type: none"> • Fixed css for DATETIME and TIME datepicker of TEI attribute fields.
v 1.68.4 SNAPSH OT 8	2020, Apr 17	new.psi-mis.org	2.33.3	<ul style="list-style-type: none"> • Fixed date range for a new event with DHIS new logic; Fixed css for DATETIME and TIME datepicker of event input fields
1.68.4 SNAPSH OT 7	2020, Apr 14	new.psi-mis.org	2.33.3	<ul style="list-style-type: none"> • Fixed bug - Allow to create TEI with all TrackedEntityTypes, not only "Person"
1.68.5 SNAPSH OT 6	2020, Apr 13	new.psi-mis.org https://dev.psi-mis.org/	2.33.3	<ul style="list-style-type: none"> • Fixed - Some events are missing when we click the RUN button for programs with catCombo, ALL option.
1.68.4 SNAPSH OT 5	2020, Mar 24	new.psi-mis.org https://dev.psi-mis.org/	2.33.2	<ul style="list-style-type: none"> • Fixed bug "Coordinates in event aren't saved when event is created/updated"
1.68.4 SNAPSH OT 4	2020, Mar 24	new.psi-mis.org https://dev.psi-mis.org/	2.33.2	<ul style="list-style-type: none"> • Fixed bug of creating TEI

1.68.4 SNAPSHOT 3	2020, Mar 11	new.psi-mis.org https://dev.psi-mis.org/	2.33.2	<ul style="list-style-type: none"> Add new TEA valueTypes UNIT_INTERVAL, EMAIL, INTERGER, INTEGER_ZERO_OR_POSITIVE, INTEGER_POSITIVE, INTEGER_NEGATIVE, EMAIL
1.68.4 SNAPSHOT 2	2020, Mar 04	new.psi-mis.org https://dev.psi-mis.org/	2.33.2	<ul style="list-style-type: none"> Change UNIT_INTERVAL valueType field allow to enter 0 and 1 values Add new DE valueTypes INTERGER, INTEGER_ZERO_OR_POSITIVE, INTEGER_POSITIVE, EMAIL Fix bug in value type INTEGER_NEGATIVE and UNIT_INTERVAL
1.68.4 SNAPSHOT 1	2020, Feb 15	new.psi-mis.org	2.33.1	<ul style="list-style-type: none"> The follow-up (button with exclamation triangle) wasn't showed
1.68.4	2020, Feb 14	new.psi-mis.org	2.33.1	<ul style="list-style-type: none"> Fixed API link to get user information . The link /api/me/user-account wasn't supported by DHIS 2.33 any more.
1.68.3	2020, Feb 14	data	2.30	<ul style="list-style-type: none"> The app with version 1.68.3 was reverted to 1.68.1 on data server → need to upload version 1.68.3 again
	2020, Feb 13	data, new.psi-mis.org	2.30	<ul style="list-style-type: none"> Fixed bug: the year fields of option Monthly not display the year from 2020
	2020, Feb 12	Staging, clone		
1.68.2	2020, Jan 23	data	2.30	<ul style="list-style-type: none"> Add username in header bar.
1.68.1	2019, Mar 27	data	2.30	<ul style="list-style-type: none"> When entering information into the event form fields, the app pop-up a message: 'Failed to update the event' and information is not saved.
1.68.0	2019, Mar 14	Clone data	2.30	<ul style="list-style-type: none"> Remove the message "Search Key Value empty - PLEASE CHECK IF THE SEARCH KEY ATTRIBUTE EXISTS IN TrackedEntityType" when we type a string to search clients
1.67.10	2019, Mar 13	Clone	2.30	<ul style="list-style-type: none"> Change logic - For expired period type and expiredDays, if expired period type

				<p>is empty and expiredDays is 0, we ignore to check if events expired . If expired period type is not empty (Monthly, Weekly, ..) and expiredDays is 0, we check if events expired .</p>
1.67.9	2019, Feb 27	Clone	2.30	<ul style="list-style-type: none"> Fix bug - A certain date (not event date) filled in event date field of an existing event if an expired period type is set
1.67.8	2019, Feb 27	Clone	2.30	<ul style="list-style-type: none"> "Incomplete Action User Role" field of "Setting" form; look for incomplete authority into the presence of the authority 'uncomplete' or 'all' Change the logic of the Re-open button (if stage gets block after completed and current user doesn't have 'uncompleted' authority, then disabled 'Re-open' button)
1.67.7	2019, Feb 21	Clone	2.30	<ul style="list-style-type: none"> Allow users to change data values for mandatory fields of a complete event. But they cannot make it empty. Change the logic of "re-open" button (for unexpired events that has been completed, but is blocked with 'Block after completed' check, we will need authority (user role) to 'Re-open' it. If no 'Block after completed' check is present, anyone can 'Re-open' the completed event.)
1.67.6	2019, Feb 19	Clone	2.30	<ul style="list-style-type: none"> Change the logic of "re-open" button (Block form when an event is completed and 'Block after completed' is checked; allow to "re-open" form based on "complete expired days", remove the userrole for checking "re-open" button if it can enable or not) .
1.67.5	2019, Feb 14	Data, clone	2.30	<ul style="list-style-type: none"> Fixed partial update on completed event setting back to 'active'.
1.67.4	2019, Feb 13	Data, leap	2.30	<ul style="list-style-type: none"> Fixed event add new button now showing case - by having the app wait for programStage data preloading.
1.67.2	2019, Feb 13	Data, leap	2.30	<ul style="list-style-type: none"> Tei searching fixed without 'TrackerEntityType' adding attributes.
1.67.0	2019, Feb 07	leap	2.30	<ul style="list-style-type: none"> Tei searching regardless of selected program issue fixed - with requirement of

				the key search attribute added to 'TrackedEntityType'.
1.66.9	2019, Jan 31	Data, clone	2.30	<ul style="list-style-type: none"> Follow-up icons updated with proper tooltip
1.66.8	2019, Jan 30	Data, clone	2.30	<ul style="list-style-type: none"> Fixed birth related attributes date picker issue - not going back to 1900. Fixed event expire logic - if 'expiry' related days (including complete---) are set to '0' in program, it will consider as not set, yet.
1.66.7	2019, Jan 25	Data, clone, staging, sandbox	2.30	<ul style="list-style-type: none"> Modified to work with DHIS 2.30 (Below) Tracked Entity Attributes saving modified Event data saving modified More description show - on disabled event row Event coordinate auto populate set. Modified validation on url fields, number, disabled some fields. Incident Date always show issue fixed OrgUnit open/close date check on event create implemented. FeatureType as 'POINT' check added for collection coordinate case. Added some progress UI on event updating.
1.66.5 - SNAPSHOT	2018, Jul 10	clone.psi-mis.org	2.25, 2.26, 2.27 2.28	<ul style="list-style-type: none"> Fix bug - Setting data is not saved Show IncidentDate and Enrollment Date if no Active program status exists
1.66.4 - SNAPSHOT	2018, Apr 18	clone.psi-mis.org	2.25, 2.26, 2.27 2.28	<ul style="list-style-type: none"> Load program list by user roles
1.66.1 - SNAPSHOT	2018, Apr 18	Staging.psi-mis.org https://play.dhis2.org/2.28	2.25, 2.26, 2.27 2.28	<ul style="list-style-type: none"> Add "Warning on complete" and "Error on complete" program rule
1.66 - SNAPSHOT	2018, Apr 09	Staging.psi-mis.org https://play.dhis2.org/2.28	2.25, 2.26, 2.27 2.28	<ul style="list-style-type: none"> Enabled to enter "Enrollment date" and "Incident date", "Allow future enrollment dates", "Allow future incident dates", "Shows 'incident date' description", "Shows 'enrollment date' description" Did 'Show 'Description of report date' for SEwoR Add "Mark for follow-up (button with exclamation triangle)"

				<ul style="list-style-type: none"> • Enable the user to delete an event or scheduled event • Support value type Time, Date & Time, Negative Integer, Unit interval, Coordinate for TE Attributes • Support value type Time for Data Elements
1.65	2017, Nov 16 2017, Nov 21	Dhis2.asia Clone.psi-mis.org Staging.psi-mis.org sandbox.psi-mis.org	2.25, 2.26, 2.27 2.28	<ul style="list-style-type: none"> • Upgrading compatibility to 2.26 / 2.27 / 2.28 • ADD CatCombo (Combination of Categories) as a new controller after program selection • Fixed bug - "Create" event button is often disabled
1.64.1	2017, Oct 26	Dhis2.asia	2.25	Fixed bug - Bugs on Complete/ Incomplete: data not preserved/ retrieve
1.64	2017, Oct 25	Dhis2.asia	2.25	<ul style="list-style-type: none"> • Clear data values if the fields are hidden by program rule • Translations for: <ul style="list-style-type: none"> ○ Program, Program Stage, Data Elements, Attribute, Options of an OptionSet. Pending: Cat Options ○ UI keywords- gTranslate for KH • Display the map for selected orgUnit in all views (only for GPS coordinates) • Controlling the EDITING/ locking of event based on revised logic with <i>completed</i>, <i>expired days</i> and <i>enrollment status</i>. Add ALL options for program status • Remove the 'default' text if the data element doesn't have a catcombo (just leave it blank) • Fix bug - Cannot create second event for SEwoR program (only can create one event when TEI enrolled in the program) <p>Known bugs: Oct 25: Bugs on Complete/ Incomplete: data not preserved/ retrieve CatCombo - Translations don't show in DataSet layout (column headers)</p>
1.63.2	2017, Oct 13	Dhis2.asia	2.25	Fixed bugs:

				<ul style="list-style-type: none"> • Error on switching from Matrix to Specific Period • Dataset don't show for PPM Orgunit • DATE Values of dataset are not saved properly • Datavalue push is done regardless if the Dataset is assigned to OU or not.
1.63.1	2017, Oct 12	Dhis2.asia	2.25	<ul style="list-style-type: none"> • Add Role Description: "Controls access to TTC setting menu - role automatically created by TTC on first run" • Change headers for Matrix, week view from "Week 38 2017" to "w38/17" • Sort Org Units list in matrix result • Partial resolution of displaying related dataset (still not working for PPM)
1.63	2017, Oct 7	Dhis2.asia	2.25	<ul style="list-style-type: none"> • Backporting of OU search fix in 1.54 (see below)
1.54	2017, Oct 5	Data, clone	2.25	<ul style="list-style-type: none"> • Person search not working with OrgUnit Tree Popup - due to old webApi method not changed.
1.62	2017, Oct 2	Dhis2.asia (dev app)	2.25	<ul style="list-style-type: none"> • DHIS User Role '_App_TTC_Admin' gets added if it does not already exists - when the app starts. • Settings options are visible to users that have the '_App_TTC_Admin' OR the authority 'All' • On 'Setting', period selection is now possible • If only one matrix periods is selected, matrix auto-run one a OU + Program are selected. • Updated logic for event creation and edit: <ul style="list-style-type: none"> - If a program has expiry date, events for locked period cannot be added OR edited*. - Events CANNOT be created in the future
1.61	2017, Sep 26	Dhis2.asia (dev app)	2.25	<ul style="list-style-type: none"> • Remove unused settings and fixed bugs in relative periods
1.60	2017, Sep 25	Dhis2.asia (dev app)	2.25	<ul style="list-style-type: none"> • Add aggregate data element hide in Settings
1.59	2017, Sep 23	Dhis2.asia (dev app)	2.25	<ul style="list-style-type: none"> • Add data set form which links to program in Event List
1.58	2017, Sep 15	Dhis2.asia (dev app)	2.25	<ul style="list-style-type: none"> • Add all villages from gSheet to the app

1.57	2017, Sep 10	Dhis2.asia (dev app)	2.25	<ul style="list-style-type: none"> • Add Village Picker
1.56	2017, Aug 30	dhis2.asia	2.25	<ul style="list-style-type: none"> • Matrix function : Populate Program list based on Children OUs • Run view if Org Units has a single program • Disable RUN until a parameter changes after a view has been generated • Set Event Calendar date picker to Period Month/ 1st; If Period in view == includes today, leave current logic (today) • Calendar Picker ONLY shows dates that are allowed • Open the forms if the selected program doesn't have expiry dates/ period
1.55	2017, Aug 04	dhis2.asia	2.25	<ul style="list-style-type: none"> • Hide data elements by orgunit groups • Fixed expired date of period types
1.54a	2017, Aug 03	dhis2.asia	2.25	<ul style="list-style-type: none"> • Implement the matrix OrgUnit/Period functionality
1.53	2017, May 26	Staging, latest, sandbox, data	2.25	<ul style="list-style-type: none"> • ProgramRule '(' bug fixed.
1.52	2017, Apr 17	staging, Latest, old-staging	2.25	<ul style="list-style-type: none"> • Added Horizontal auto scrolling of browser: when choosing period and after 'Run' button click. • ProgramRules for 'Latest on Program', 'Latest on Stage', 'Previous Event' has been disabled due it them not being stable currently.
1.51	2017, Apr 01		2.25	<ul style="list-style-type: none"> • ProgramRules fixes: • String values marked as string, so that they do not get calculated as numbers • Condition check on Mix of string and numbers, and sub calculation. • Implemented values retrieval for DataElement 'Latest on Program', 'Latest on chosen Stage', 'Previous event value'.
1.50	2017, Mar 26		2.25	<ul style="list-style-type: none"> • 1.47 implementations added on 1.49.
1.49	2016, Oct 29	james	2.22 ~ 2.25	<ul style="list-style-type: none"> • TEI first attribute empty case handle. • Tested and confirmed for 2.25 - no changes were needed (except probably programRule related are needed)

1.48	2016, Aug 31	dev, www-staging	2.22	<ul style="list-style-type: none"> • [Testing]Program rules mixed condition (between TEI attributes and latest event dataElements (only program level latest for now)) and mixed between condition/action has been implemented.
1.47	2017, Mar 26	www	2.22	<ul style="list-style-type: none"> • Date type dataElement validation when manually entered implemented. • TEI search implemented with max result limit set to 100. • Added Horizontal auto scrolling of browser: when choosing period and after 'Run' button click. (On April 8th)
1.46	2016, Aug 05	hnqis-staging, www, dev, www-staging	2.22	<ul style="list-style-type: none"> • Modified event date type values to be saved 0.2 seconds later - to fix the calendar popup delay issue. • Long_Text for dataElement rendering (Textarea) bug fixed. (NOTE: this fix has not been applied to 1.47, 1.48 due to them being development in process phase)
1.45	2016, Jun 21	www, dev, www-staging	2.22	<ul style="list-style-type: none"> • TEI attribute 'checkbox' data loading 'checked' value properly.
1.44	2016, Jun 20	www, dev, www-staging	2.22	<ul style="list-style-type: none"> • DataElement optionSet sort issue appearing sometime fixed.
1.43	2016, Jun 17	www, dev, www-staging,	2.22	<ul style="list-style-type: none"> • 'Incomplete/Complete' button moved back to end of the row.
1.42	2016, May 16	dev, www-staging	2.22	<ul style="list-style-type: none"> • Implemented the new DataElement valueTypes and validation for 'Number' and 'Letter' • Removed the hidden dataElement control fields and changed implementation to insert only the ones needed.
1.41	2016, May 16	www, dev, www-staging, dhis2.asia/ psi	2.22	<ul style="list-style-type: none"> • Incomplete/Complete button moved on 'Status' column • Minor UI changed <ul style="list-style-type: none"> ○ Button design changed slightly - to be milder 3D button ○ TEI detail popup page table style changed.

				<ul style="list-style-type: none"> ○ Input textbox padding added, orgUnit name cleared when page is refreshed, etc.
1.40	2016, Apr 26	www, dev, www-staging, dhis2.asia/ psi	2.22	<ul style="list-style-type: none"> ● Tracked Entity instance popup (person popup) optionSet not showing as dropdown issue fixed. (caused by 2.22 Web API change)
1.39	2016, Apr 01	dhis2.asia/ psi	2.22	<ul style="list-style-type: none"> ● New 2.22 DataElement value type displayed as 'Not Supported'.
1.38	2016, Mar 04	latest.psi-m is.org	2.22	<ul style="list-style-type: none"> ● 2.22 compatible version: ● All the web api specific fields defined. ● DataElement valueType changed followed (2.21 change) ● TEI Attribute valueType changed followed (2.21 change) ● Event delete fails if the audit data exists ← simply displays the message about it. (should we delete the audit info automatically?) ● TEI update → If attribute has program scope, it fails. ● Enrollment property 'dateOfEnrollment' changed to 'enrollmentDate'.
1.37	2016, Mar 04	www www-staging dev	2.20	<ul style="list-style-type: none"> ● Loading event data with 'date' or 'true only' type bug fixed.
1.36	2015, Nov 24	www www-staging james dev	2.20	<ul style="list-style-type: none"> ● Removed on upload time location save for PSI version. ● On orgUnit search, remove the orgUnit selection on popup. ● Button style on popup changed.
1.35	2015, Oct 20	james www-staging	2.20	<ul style="list-style-type: none"> ● New 'parents' property of orgUnit option implemented with backward compatible. ● Improved search (orgUnit Name, TEI search) - canceling old search if keyword is changed.
1.34	2015, Oct 15	www www-staging james dev	2.20	<ul style="list-style-type: none"> ● Event dropdown value selection on different program issue fixed.
1.33	2015, Oct 12	www www-staging	2.20	<ul style="list-style-type: none"> ● On 'event' create, enrollment to program check implementation has been changed to better handle 2.20 changes. If TEI is not

		james dev		enrolled to program, it will now prompt a message and open the TEI Info popup.
1.32	2015, Oct 09	www www-staging james dev	2.20	<ul style="list-style-type: none"> Enrollment check change to search for all orgUnits rather than specific orgUnit.
1.31	2015, Oct 06	www www-staging james dev	2.20	<ul style="list-style-type: none"> 'Complete' / 'Incomplete' continuously causing duplicate message/action fixed. Event dataValue deletion changed to perform proper deletion rather than update with empty string.
1.30	2015, Oct 04	www www-staging james dev	2.20	<ul style="list-style-type: none"> Event update changed to apply the individual data element value only rather than all the values in that event. Map popup 2nd time issue fixed.
1.29	2015, Sep 28	www www-staging james dev	2.20	<ul style="list-style-type: none"> TEI 'Number'/'Letter' type UI validation added. OrgUnit selection popup issues fix: 1. remove other DHIS app orgUnit selections clear when this app opens. 2. Selection from popup including expanded children names including bug fix.
1.28	2015, Sep 24	www www-staging james dev	2.20	<ul style="list-style-type: none"> TEI search bug occurring when 2nd attribute value is empty fixed.
1.27	2015, Sep 23	www www-staging james dev	2.20	<ul style="list-style-type: none"> Auto search (orgUnit search, TEI search) delay number change to 0.8 seconds TEI attribute valueType UI keydown validation disable due to numberpad input being detected as different key code.
1.26	2015, Sep 21	www www-staging james dev	2.20	<ul style="list-style-type: none"> Adjusting to the DHIS 2.20 web api changes: "Type/OptionSetUse" variable has been changed and type name has been changed: <ul style="list-style-type: none"> - program type name, tracked Entity attribute valueType has a few more types added. - dataElemnt long Text as textarea has been implemented. "Add"/"Update" response message structure has been changed: <ul style="list-style-type: none"> - tracked entity instance add new/update response message changes

				<ul style="list-style-type: none"> - enrollment response message changes - events create response message changes • Tracked Entity Instance search result data structure has been changed. Search loading circle implemented. • Tracked Entity Instance retrieval home unit display fix. • Program listing retrieval Web API for a orgUnit has been changed, so that it loads faster. • Tracked Entity Instance Attributes check/validation from DHIS is disabled. Thus, implemented 2 layer check for this. <ol style="list-style-type: none"> 1. 'Number'/'Letter' type textbox not allowing other characters. 2. DHIS server error message parsing and formatting to display proper messages and highlight fields.
1.25	2015, Aug 30	www james dev	2.19	<ul style="list-style-type: none"> • 'Add Event' row added on the top of the event listing table as well as bottom. 'Add new row' for TEI as well.
1.24	2015, Aug 24	www james dev	2.19	<ul style="list-style-type: none"> • 'Run' button has been added for executing data retrieval • 'Incomplete' feature for event incompleting (moving from 'completed' -> 'active') has been added. UserRole for this incompleting is stored in the app.. • Button style changed.
1.23	2015, Jul 01	www dev www-staging james	2.19	<ul style="list-style-type: none"> • On event search, retrieving each TEI has been replaced with use of DHIS 2.19 new Web API 'eventRows'. • Checking for App's latest version has been implemented - deploymentManager entered latest version vs user's cached app version.
1.22	2015, Jul 01	www dev james	2.19	<ul style="list-style-type: none"> • latest version check option implemented. Latest version number is manually stored in AppSetting via 'setting' popup.
1.21	2015, Jun 21	www dev james	2.19	<ul style="list-style-type: none"> • bug fixed on handling TEI 'boolean' attribute - in TEI(person) popup.
1.20	2015, Jun 20	www dev james	2.19	<ul style="list-style-type: none"> • Non-intrusive messaging implemented. • Fitted for 2.19 Web API ('enrollment', event paging) • Combined some web api calls into a single call.

1.19	2015, Feb 10	www	2.17	<ul style="list-style-type: none"> Unregistered event (Auto-generated) display under the trackedEntityInstance and update implement.
1.18	2015, Jan 16	www james	2.17	<ul style="list-style-type: none"> Old ad-hoc translation removed. Single Event Without Registration 'Add New' button not showing bug / duplicate row bug fixed.
1.17	2015, Jan 06	www james	2.17	<ul style="list-style-type: none"> Option Code as saved value implementation for 2.17.
1.16	2014, Dec 29	www james	2.17	<ul style="list-style-type: none"> Make it compatible for 2.17 Internationalization locale - translation when DHIS Interface language is changed (Implemented by Victor) OrgUnit selection now has a button for orgUnit Tree Selection popup. Month dropdown selection on period monthly selection issue fixed - case happens if current month is January.
1.15	2014, Oct 13	james dev www		<ul style="list-style-type: none"> birth date year range fix App Title change and title space above/below increase Lighter text for event count on person row.
1.14	2014, Oct 08	james dev www		<ul style="list-style-type: none"> For loading speed enhancement, events are initially hidden. person list is now sorted, which takes a couple more seconds to the loading speed. Events are retrieved on first person row expanding. Sorted person search list Added event number count on person row Application Title retrieved from DHIS AppSetting DataElement formName display issue fixed
1.13	2014, Oct 02	james		<ul style="list-style-type: none"> Right top organisation unit map size/location change.
1.12	2014, Sep 29	james dev		<ul style="list-style-type: none"> Modified to load the events faster, but person list will not be listed in order until DHIS has this capability on event API. Application setting popup (on right top) has been implemented for country level question. It will not let users use the app until it is setup - will popup for question. Followed Lars recommendation on file layout.

1.11	2014, Sep 24	james www-staging www		<ul style="list-style-type: none"> • Org unit selection map display (if has location info) on the right top corner. Only point location types are being displayed. Not area types. • Translation for ad-hoc appearing text implementation changed, modified translation logic to get key list better, and translation display order set.
1.10	2014, Sep 23	james www-staging www		<ul style="list-style-type: none"> • On event search, display retrieval error message if occurs. • Loading remembered translation choice load on start issue fix. • 'jquery.min.map' display on log issue fixed • Faster on staging data load in background. • Sorted the data element option set dropdown list. • Event section translation disabled for now due to a bug that causes loading speed issue.
1.09	2014, Sep 18	james www-staging www		<ul style="list-style-type: none"> • OrgUnit search takes special character. • Single Event without Registration scrolling up when completing fixed. • Alerts and confirmation messages are in translation now. • Top header added for matching look with PSI DHIS. • Org Unit Search now lists org units in alphabetical order.
1.08	2014, Sep 13	james www-staging		<ul style="list-style-type: none"> • Enrollment check API issue fixed. • Person search listed in alphabetical order. • Minor loading enhancement.
1.07	2014, Aug 29	james		<ul style="list-style-type: none"> • Modified for 2.16 Web API. • Country selection removed. • Org Unit search is changed to only search user accessible org units.
1.06	2014, Aug 13	dev2 james www		<ul style="list-style-type: none"> • 'Complete' button display issue fixed on Multiple Event With Registration case. • Program Stage error issue fixed when creating event.
1.05	2014, Aug 13	dev2 james www		<ul style="list-style-type: none"> • Program status on search selection implemented (* 'Completed' & 'Cancelled' program can not add/edit events). • Events are changed to be deletable if not in completed status.

1.04	2014, Aug 13	dev2 james www		<ul style="list-style-type: none"> • Period 'Other' bus resolved and label changed to 'Custom'. • Translations missing ones added and bug fixed.
1.03	2014, Aug 12	dev2 james www		Released to Production
1.02	2014, Aug 11	dev2 james		<ul style="list-style-type: none"> • Events are set to be not deletable once created - following the DHIS behavior. However, event data is editable unless flagged it as otherwise in programStage. • Events dates are set to be always editable. • Non-repeatable programStage event data load issue fixed.
1.01	2014, Aug 7	dev2 james		<ul style="list-style-type: none"> • Prevent the same person to be retrieved & displayed more than once. • Event dates or Registration Dates in the future are NOT available anymore - everything happens either today or at any point on the past • Option to re-enroll into a program now possible • Completed events are not longer editable - they get locked • Updated Labels: <ul style="list-style-type: none"> ○ Time Period selector 'other' → 'custom' ○ Coordinates: 'Lng' → 'Long'
1.00	2014, Jul 29	dev2 james		<ul style="list-style-type: none"> • Headers color changes • Top Search panel integrated into a single box • Populate button removed - instead, on selection of period, or by checking search criteria optios, screen re-populates • Person 'Add new', 'Update' button added. • Watermark description on person search input • Version/Release note changed to google doc. • Changed the completed to be editable depending on the programStage flag ('Block entry form after completed')
