

GGCC Children's Ministry Health Guidelines

The parent/guardian of a child will be notified immediately if a health problem appears to be developing or in the case of an accident or emergency. At least one GGCC representative will be available at all times to assist in emergency.

First aid kits are available in the following locations:

1. Nursery wall cabinet
2. Front Desk – Children's Ministry wing
3. Supply closet – Children's Ministry wing

Once first aid has been administered, it is the responsibility of the parent/guardian to arrange for further treatment and aftercare. In the case of a serious emergency, a 911 call will be placed immediately by a GGCC representative.

Any child, volunteer, or staff worker with any symptom of an infectious illness may not attend any Children's Ministry programs. That person with an infectious illness may not return to the church until there has been an absence of symptoms for at least 24 hours.

Strict handwashing must be practiced by all children, volunteers, and staff workers after going to the bathroom, or assisting in toileting or diapering. Disposable gloves should be worn when dealing with blood, bodily fluids, broken or grazed skin, and contact with mucous membranes (e.g. eyes, nose, and mouth) as well as the handling of food. Every effort will be made to prevent the sharing of food, cups, etc.

The parent/guardian is responsible for writing on the GGCC participant enrollment form any health conditions pertinent to the child's well-being such as epilepsy, toxic reaction to insect stings, food allergies, asthma, diabetes, etc.

Medication: Children's Ministry workers do not administer medication. If a child has specific medical needs, then special arrangements may be made. The parent/guardian of a child requiring treatment for asthma will be contacted and will be responsible for administering such treatment.
