Interactive Museums for Language Arts and Social Studies

Danielle Corrao, PA (NOTE: Haven't checked to guarantee these links don't require a login. I'm working on that. 7/20/20)

[This session](#) will give ideas on different ways to create interactive museums that tie in both

reading/literacy skills and social studies. Two main examples will be on the topics of Greek Mythology, 9/11, and children's books. Videos on Greek Mythology as well as videos from Discovery Education's Museum Access Channel will be featured.

Older Handouts

This server is no longer.

The list for reference only. I will get this re-uploaded. If you need any of these specifically, let me know with direct message at Twitter @halldavidson

Presentations and handouts:

Note: Downloaded PowerPoints may have trouble opening on some machines because the videos are not attached. It takes time for the machine to attempt to find each attached video. Eventually, it offers the choice to download without videos. The **pdf's** are safer and should download without problems. Attaching videos would make the downloads impossibly large. Be sure to check the pdf's and presentations before you print hardcopy. Many contains pages in addition to what was presented. These are valuable for reference but you may not need a hard copy.

Note that many of the PowerPoints are the newer Microsoft Office .pptx format. They should open in previous versions of Microsoft PowerPoint. The files were created in PowerPoint on either Mac or PC. Many of these files are large. I apologize in advance for the download time. Shortened URL for this page is <http://tinyurl.com/4xzktwf>.

For questions regarding presentations in person, contact Chrysti Hill by phone at 240.662.2831 or by email.
or by email.

NEW Posting of video on how to turn an iPad into a microscope.

Google Earth Handouts (older version from Encyclomedia Conference), new version coming soon). Content pretty much the same.

[GoogleEarth\(ppt\)](#)

[Codes for Pasting in GoogleEarth \(pdf\)](#)

[Sample kmz files](#) to use for copy and paste are [here](#) in an older blog post. [More blog posts.](#)

Note on Media in Google Earth: When saving a Placemark with embedded flash video, the video file does not come with the saved file. An embedded image in a placemark does, but the flash apparently does not. Although I was certain I had embedded flash in a save file, I cannot duplicate this so must conclude that currently an embedded **flash file doesn't attach**. This is a change in the new versions Google Earth. Who knows what will happen in future versions. Whether the image comes along also depends on the version of GE.
