[Caught on Camera: Opossums, bunnies, coyotes and deer using land bridge](#) June 22, 2021, Texas, WOAI San Antonio

...A study of wildlife crossings by the University of Natural Resources Conservation at the University of Massachusetts, Amherst, recommends crossings be a minimum of 50 meters wide (164 feet) at the base and as little as 8 meters (26 feet) at the center to encourage wildlife to use it. Hardberger Park's Land Bridge is larger ...

[Crossing to safety: How driver attention and innovative design can help protect wildlife](#) January 10, 2021 Texas, Click2Houston

... innovative yet low-tech measure to minimize nighttime deer collisions is a rear-facing light bar mounted on the front of a vehicle. Illuminating the grill area presents a more visible looming object, reducing the "frozen in the headlights" behavior of deer. Researchers report the use of light bars reduces the likelihood of hitting a deer from 35 percent to 10 percent...

[Why did the wildlife cross the land bridge?](#) December 26, 2020 Texas, The Journal Gazette

... "The 150-foot long land bridge is the first in the world designed for safe passage for both people and wildlife," ... spans the Wurzbach Parkway in San Antonio...

[San Antonio unveils new wildlife land bridge](#) December 16, 2020 Texas, Inhabitat  
... We've had some accidents between cars and deer especially ... The newly built Robert L.B. Tobin Land Bridge now connects two sections of a San Antonio park that were previously separated by a highway...

[97A wildlife fence helps reduce vehicle/animal collisions](#) September 23, 2020 Texas, Quad City Herald

... Parts of 97A between Chelan and Wenatchee have been the scene of scores of animal/vehicle accidents over the years and led to a cooperative effort between public/private group to install miles of wildlife fencing along portions of the road's west side to help keep mule deer and bighorns away from the highway...
