Organizing Your Moodle Course

11:00am - 12:00pm

What does a well-designed Moodle course look like? How can you organize your course to facilitate ease of use? This session will explore tips, tools, and best practices for organizing your Moodle course.

[*Workshop Recording*](#)

Moodle Gradebook: Basic Setup, Display, and Functionality

1:00pm - 2:30pm

Learn the basic functionality of the Moodle gradebook, how to set up a basic gradebook, and how to enter grades. This session will cover the most common gradebook calculations: total points, averaging, and weighted categories.

Going Further with Moodle

January 5th, 2023 (Thursday)

Moodle Forums

9:00am - 10:00am

Tired of the traditional discussion forums in your class? Overwhelmed by grading discussion forums? In this session we will take forums to a new level by exploring the different forum types available in Moodle, the questions and activities that can make the most of those forum types as well as discuss a variety of grading strategies for large and small courses.

Rubrics & Grading Guides: Consistent and Effective Assessments in Moodle

10:30am - 11:30am

Rubrics and grading guides are useful ways to communicate effectively with students about assignment requirements, while also creating a guide for you to grade them more easily and consistently. In this session, we will explore the qualities of good rubrics, discuss different types of rubrics, and talk about how to create rubrics and grading guides inside of Moodle.

Activity Completion and Restricting Access in Moodle

12:00pm - 12:30pm

Use Moodle "Activity Completion" and "Restrict Access" features with content and activities like quizzes, pages of content, video assignments, and more to help students progress through a course while keeping track of their proficiency and what they've completed. In this session we will review uses of activity completion and access restriction and create Moodle activities with the appropriate settings.

Stealth Activities in Moodle

1:00pm - 1:30pm

Use this Moodle trick to link to activities located in different sections of a Moodle course. Instructors can create activities or resources and make them available but hidden from students and then link to those activities/resources. Using these "stealth activities" can help organize and design a Moodle course with less scrolling for students.
