

About Pigeonly

Pigeonly builds technology products for the overlooked and underserved. To date we've launched two products that address and solve communication barriers between inmates and their support network of family and friends.

We're a small team of creative rebels (currently 15-20 people) and have a flat and open structure. We have a collaborative culture built on hacking ideas, code, and business models. We're looking for additional trouble makers to join our team who enjoy solving huge problems, disrupting archaic industries, and are not afraid to dream big.

Requirements:

We're looking for a PHP developer to join our team. The ideal candidate will be able to carry out new product development from conception to implementation, high-quality and high-volume programming, while displaying a keen eye for quality assurance and code maintenance.

The ideal candidate will have proficiency in the following areas:

- **Candidate must work in our Las Vegas office.**
- Experience working in a framework such as Symfony, Zend, or other MVC framework
- Good understanding OOP principles
- MariaDB/MySQL
- Doctrine ORM
- Linux Command Line
- The ability to iterate and execute ideas swiftly, with minimal direction.
- Experience with revision control systems, preferably git.

The ideal candidate will have some experience in the following:

- Experience in VOIP
- Experience with some form of web/data scraping.
- Experience working with a 3rd party API such as Google Maps, Facebook, or Plivo
- Experience with Google Cloud, AWS, or other cloud architecture.

To Apply:

- Please send your resume to devjobs@pigeon.ly
- Include a link to your github or code samples, if available.
- Please add a few lines about why you think you'll be a good fit for our team.
