

Privacy Policy

Last updated: 31 March 2026

YouTube Screen Time ("the extension") is designed to help users track the amount of time they spend on YouTube.

Data Collection

This extension does not collect, transmit, or share any personal data. No personally identifiable information (such as name, email address, or location) is collected.

Local Storage

The extension stores YouTube usage time locally on the user's device using Chrome's storage API. This data is only used to calculate and display daily screen time and is not accessible to the developer or any third parties.

Data Usage

All data is used solely for the purpose of providing the extension's core functionality — displaying the user's YouTube screen time.

Data Sharing

No data is sold, transferred, or shared with any third parties.

User Control

Users can remove all stored data at any time by uninstalling the extension or clearing browser storage.

Security

Since all data is stored locally and not transmitted, no external data security risks are introduced by this extension.

Changes to This Policy

This privacy policy may be updated if the extension's functionality changes. Any updates will be reflected in this document.
