

Depth of Analysis Level 2

Step 1. Select and analyze the assignment

Briefly describe the assignment	
Explain the goals/purposes/objectives of the lesson	
Describe what you were looking for in the assignment	

Step 2. Sort the papers into three categories - red (does not meet the learning objective), yellow (nearly meets the learning objective), green (meets or exceeds the learning objective).

Step 3. Choose a student's work sample to analyze. Analyze the student's work considering the following questions.

- What does the assessment reveal about what the student does or does not understand about the concept/topic?
- What does the student understand?
- What is the student beginning to understand?
- What is the student struggling to understand?
- Discuss why you think this student is struggling or doing well?

Step 4. Discuss the next learning target and action step for the student and record in the chart below.

Student Name	What does this student need to learn next?	What steps will you take to help the student progress?

**** make as copies of this page as needed to analyze all student samples ****

Step 5: Repeat steps 3 and 4 for all students.
