1 - Selezionando su Zoom: Record active speaker with shared screen

Cloud recording

Allow hosts to record and save the meeting / webinar in the cloud

- ☒ Record active speaker with shared screen
- ☐ Record gallery view with shared screen 
- ☐ Record active speaker, gallery view and shared screen separately
- ☐ Record an audio only file
- ☐ Save chat messages from the meeting / webinar

Risultato in Kaltura: Unica traccia dove si vede la registrazione dello dello speaker e (se c'è) dello schermo condiviso

Il “diagramma della rosa” del 1858,

col quale l’infermiera Florence Nightingale, la leggendaria “signora con la lanterna” e prima donna ad essere ammessa alla Royal Statistical Society di Londra, rivoluzionò la sanità militare dimostrando che la principale causa di morte dei soldati durante la Guerra in Crimea non erano le ferite in battaglia ma le infezioni contratte negli ospedali da campo.

**DIAGRAM OF THE CAUSES OF MORTALITY
IN THE ARMY IN THE EAST.**

2. APRIL 1855 to MARCH 1856

1. APRIL 1854 to MARCH 1855.

The Areas of the blue, red, & black wedges are each measured from the centre as the common vertex.

The blue wedges measured from the centre of the circle represent areas for area the deaths from preventable or mitigable zymotic diseases; the red wedges measured from the centre the deaths from wounds; & the black wedges measured from the centre the deaths from all other causes.

The black line across the red triangle in Nov^r 1854 marks the boundary of the deaths from all other causes during the month.

In October 1854, & April 1855 the black area coincides with the red, in January & February 1855 the blue coincides with the black.

The entire areas may be compared by following the blue, the red & the black lines enclosing them.

Florence Nightingale, 1858
