

Classify Bacteria Activity

Use the key in Module 2 to classify these bacteria.

1. Clostridium botulinum:
Gram negative
Spore-forming
Rod
Anaerobic
2. Escherichia coli:
Gram negative
Rod
Facultative anaerobe
3. Staphylococcus aureus:
Gram positive
Cocci
Clusters
Facultative anaerobe
4. Streptococcus pyogenes:
Gram positive
Coccus
Chains
Aerobe
5. Vibrio cholera:
Gram negative
Curved rod
Facultative anaerobe
