Abstract. Abstract should not be more than 200 words and is constructed in 1 paragraph which includes brief description of background/ introduction, aim, method, result/findings, and conclusions. The heading Abstract should be typed in bold 9-point Arial. The body of the abstract should be typed in normal 9-point Times in a single paragraph, immediately following the heading. The text should be set to 1 line spacing. The abstract should be centred across the page, indented 17 mm from the left and right page margins and justified.

Keywords: The heading Keywords should be typed in bold 9-point Arial. The body should be typed in normal 9-point Times in a single paragraph, immediately following the heading. The keywords should be centred across the page, indented 17 mm from the left and right page margins and justified. It should be provided below the abstract to help with the electronic search (3-5 words).

1. Introduction

This part namely Introduction gives details of background, research problems, research aim(s), and theoretical /conceptual review composed with or without sub-section. The use of sub-section to divide the text of the paper is optional and left as a decision for the author. The following descriptions are guidance to set the page layout and text format of overall manuscript.

1.1. Sub-section 1 (*if any*)

Overall manuscript of the article is written in 7-15 pages of this template, including the list of references. The paper size is 170 x 250 mm (W x H mm) and the adjustment is shown in the Table 1. The final printed area will be 130 x 210 mm. Page number is not necessary.

Table 1. Setting Word’s margins.

Margin	mm
Top	24
Bottom	16
Left	20
Right	20

Source:

1.2. Sub-section 2 (if any)

- The body of each section and sub-section should be formatted as follows:
- 10-point Times, Times Roman or Times New Roman.
 - The text should be set to single line spacing.
 - Paragraphs should be justified.
 - The first paragraph after a section or sub-section should not be indented; subsequent paragraphs should be indented by 5 mm.

1.3. Sub-section 3 (if any)

Figures and tables, as originals of good quality and well contrasted, are to be in their final form, ready for reproduction, pasted in the appropriate place in the text. Try to ensure that the size of the text in your figures is approximately the same size as the main text (10 point). Try to ensure that lines are no thinner than 0.25 point. Figures and tables should be given continuing numbers. Each figure and table also should be cited the source. Place the figure as close as possible after the point where it is first referenced in the text. Captions should be typed in 9-point Times. They should be centred above the tables and below the figures. The limitation of using tables, figure, and photographswill be appreciated.

2. Method

This section of Method explains how the research is conducted, research design, as well as techniques of data collecting and analysis. The following descriptions are guidance to set the page layout and text format of overall manuscript.

2.1. Sub-section 1 (*if any*)

Equations should be centred and should be numbered with the number on the right-hand side.

$$T_s(l, t) = T_g(l, t) \quad (1)$$

$$T_s(l, t) = T_g(l, t) T_b(x \rightarrow -\beta, t) = 0 \quad (2)$$

Use italics for variables (*u*) and bold (**u**) for vectors. The order for brackets should be $\{[()]\}$, except where brackets have special significance.

3. Result and Discussion

These part is research result/ findings, displayed as words, tables, figure, and photographs.

4. Conclusion

This part consists conclusions of paper. Conclusions present the answer of research aims(s) and/or findings obtained. The conclusions do not contain the repetition of the results and discussion, but rather the summary of them. Conclusion might also consist things that will be done related to the next/ futher study. The conclusion is written in the whole paragraph, instead of points.

Acknowledgement

The Acknowledgement addresses appreciation to party/ program/ benefactor that funds or helps research and report writing. This part may also include data availability statement and author contribution statement. It should be typed in 9-point Times.

References

References should be cited in the text by placing sequential numbers in brackets (for example, [1], [2, 5, 7], [8-10]). They should be numbered in the order in which they are cited. A complete reference should provide enough information to locate the article. References to printed journal articles should typically contain:

- The authors, in the form: initials of the first names followed by last name (only the first letter capitalized with full stops after the initials),
- The title of the article
- The journal title (abbreviated),
- The volume number (bold type),

- The article number or the page numbers,
- The year of publication (in brackets),
- The DOI number (digital object identifier)
