00:19:22.669,00:19:25.669

Sarina Canelake: no worries, it's ok!

00:22:37.777,00:22:40.777

Peter Pinch: How/where does one participate in the planning for the header plugin slot?

00:23:14.378,00:23:17.378

Sarina Canelake: We haven't done much yet, but watch the forums for information about planning. I'll make sure you get informed.

00:37:04.711,00:37:07.711

Elizabeth Gordon: Thanks for using me as an example....cause I have SOOOO many questions about what this means for our 50 themed microsites. :)

00:37:35.822,00:37:38.822

Sarina Canelake: Ultimately this will be more comprehensive and easier!

00:37:44.664,00:37:47.664

Sarina Canelake: But, it does require change

00:37:45.461,00:37:48.461

Elizabeth Gordon: We like easier! :) LOL

00:37:45.838,00:37:48.838

Adolfo Brandes: I couldn't find a recording, but this wiki page summarizes the motivation behind Design Tokens:

<https://openedx.atlassian.net/wiki/spaces/BPL/pages/3630923811/Scaling+Paragon+s+styles+architecture+with+design+tokens>

00:37:47.436,00:37:50.436

Glib Glugovskiy: this will hopefully reduce you cost for maintenance))

00:38:04.883,00:38:07.883

Sarina Canelake: As we add new elements to Paragon, they'll get themed by default, which is awesome

00:38:22.759,00:38:25.759

Glib Glugovskiy: There are a lot of benefits with some drawbacks

00:38:57.099,00:39:00.099

Adolfo Brandes: And here's the ADR:

<https://github.com/openedx/paragon/blob/master/docs/decisions/0019-scaling-styles-with-design-tokens.rst>

00:39:31.673,00:39:34.673

Elizabeth Gordon: Happy to be a guinea pig! :)

00:39:47.464,00:39:50.464

Elizabeth Gordon: Definitely sharing with the links with the team. :)

00:40:40.743,00:40:43.743

Feanil Patel: Are the dates solidified?

00:41:10.015,00:41:13.015

Jorge Londoño: Do you mean the release dates?

00:43:52.635,00:43:55.635

Jorge Londoño:
