Author information

1. Surname, first name:

Dzholdasbayeva Gulnar.

2. Position, academic degree, title:

professor, doctor of economics.

3. Education:

- Moscow state technological institute of food industry, faculty of Economics, specialty "Economics and organization of the food industry", diploma MV № 324256, 1985;

- doctor of economics, approved by the Committee for control in the field of education and science of the Ministry of education and science of the Republic of Kazakhstan, № 0000134, dated October 31, 2007;

- professor in economics, approved by the Committee for control in the field of education and science of the Ministry of education and science of the Republic of Kazakhstan, № 0000260, dated September 25, 2009.

4. Area and directions of research, including participation in scientific projects with a brief description of the results of the study:

Research area and directions:

- efficiency, competitiveness of flour milling enterprises.

Participation in scientific projects:

- responsible executor of the project on the topic "Assessment of the impact of the single Customs space on the agro-industrial complex of the Republic of Kazakhstan, including the food and processing industries of the Republic of Kazakhstan", 2011.

Results:

the assessment of the current state of all branches of the agro-industrial complex of the Republic of Kazakhstan is given, proposals have been developed to improve the agro-industrial policy, the need for state support of agriculture.

- Project manager on the topic "Problems of increasing the efficiency of flour milling enterprises", 2014-2016, state registration № 0115RK00294.

Result:

a mechanism for managing the efficiency of flour milling enterprises has been developed.

- Project manager on the topic "Assessment of the innovative potential and development of the economy of the food industry of the Republic of Kazakhstan", 2015, state registration № 0116RK00058.

Results:

the assessment of the innovative potential of the food industry of the Republic of Kazakhstan is given, priority directions of development of the industry are determined, proposals for innovative modernization are developed.

- Chief researcher of the Narkhoz University project on the topic "Development of a socio-economic mechanism for sustainable development in the field of storage and processing of agro-industrial complex of Kazakhstan", grant № 2371 / GF4, 2015-2017.

Results:

a mechanism for improving state support measures in the areas of production and processing of agricultural products, models of regional industry clusters and proposals for ensuring sustainable development of the agro-industrial complex of the Republic of Kazakhstan have been developed.

- Project executor of research on the topic "Problems of increasing the competitiveness of light industry enterprises of the Republic of Kazakhstan", 2016-2018, state registration № 0116RK00060.

Results:

the analysis of the current state of the light industry of Kazakhstan has been carried out, the ratio of imports and exports of light industry goods has been studied, proposals have been developed to improve the competitiveness of enterprises in the industry.
