## Agenda items

### WordPress 5.3 progress (gziolo)

- Build Tools: Integrate DependencyExtractionWebpackPlugin in the JS build (<https://core.trac.wordpress.org/ticket/48154>)
  - Open question: where to put generated asset files to be consumed by PHP?

### CSS support in @wordpress/scripts (kim.bertelsen)

- Related issue: <https://github.com/WordPress/gutenberg/issues/14801>
- Related PR: <https://github.com/WordPress/gutenberg/pull/14847> (last update on Apr 5 by @fabiankaegy)

### Highlights (gziolo)

- Cross-platform UI components
  - Exploratory PR: <https://github.com/WordPress/gutenberg/pull/17614> (@dratwas, @Pinar O)
- Add Storybook to help with the development of UI components
  - Related PR: <https://github.com/WordPress/gutenberg/pull/17475> (@epiqueras)
  - Alternative PR considered earlier: <https://github.com/WordPress/gutenberg/pull/17173> (@itsjonq)
  - Community project: <https://wptavern.com/wp-storybook-a-handy-reference-for-wordpress-react-ui-components>
- Introduce CustomElement interoperability for block types
  - Related PR: <https://github.com/WordPress/gutenberg/pull/17649> (@flixos90)
