

Postman - GSOC

Google Summer of Code 2024 - Final Evaluation

Project Information

Project Title: [AsyncAPI: Conference Website Maintenance](#)

Mentors: [@AceTheCreator](#) , [@Mayaleeeee](#) and [@thulieblack](#)

(Special shoutout to [@Lukasz Gornicki](#) for being coolest mentor I have ever seen)

Project Proposal:

 [Postman - GSOC-2024-proposal-Ashmit-Jagtap](#)

Project Overview:

This summer I was selected for Google Summer of Code 2024! I worked under the AsyncAPI initiative under the Postman Org. It has been a great journey until now but there is a whole lot ahead of me in my collaborations with AsyncAPI. The project assigned to me was 'AsyncAPI: Conference Website Maintenance', the main aim of the project being to improve the AsyncAPI

website and make it maintainable, so that it becomes a permanent medium for stakeholders to know about the AsyncAPI conference. The major tasks included adding the CFP form with support for Google Sheets and confirmation Emails and adding the *Cypress* testing framework to add end-to-end and component tests to the existing CI/CD pipeline of Conference Website.

My experience:

Working with AsyncAPI for these past few months has been an exciting and insightful journey, I had the chance of collaborating with a really great community of people and as well as my mentors. They guided me through a lot and were there when I needed them. I learnt a lot in these past few month including but not limited to,

- Remote Collaboration
- End-to-end and Component testing
- CI/CD pipelining and Github Actions
- Advanced Git

My experience with GSoC and AsyncAPI has been truly enriching. While it's hard to capture the depth of my learnings and interactions in just a few lines, this is my best attempt to share them!

Resources:

The most important part of any project is the results it produces. The below links can be used to track the work I have done with AsyncAPI. There's still so much more I want to accomplish, so stay tuned if you're interested!
