

Why I'm Contacting You via WhatsApp

I hope this message finds you well. I've attempted to contact you via email several times; that's why I'm reaching out to you via WhatsApp as a final attempt to connect.

I have noticed that you currently don't have any active Facebook or Instagram ads, so I took the initiative to create one for you. This could greatly benefit your business.

If you require any further assistance or information, please feel free to message me.

Best regards

Jhime

P.S.: I have studied the USA market and collected the best strategies for success; are you ready to crush your competitors?
