I am a full-stack web developer who strives to write clean, readable, and reusable code.

RELEVANT EXPERIENCE

minds+assembly

Information Technology Intern

New York, NY

06/2022 - 08/2022

- Built and designed an intranet site for the employees using Next.js
- Collaborated with internal stakeholders for collecting and presenting content for internal website
- Documented, labeled, and uploaded external hard drives onto AWS S3 cloud storage

TECHNICAL SKILLS

Javascript, React, Next.js, Ruby, Rails, HTML, CSS, Git, SQL

TECHNICAL PROJECTS

Fictionarie_ - [Github](#) | [Demo](#)

A WIP app for writing stories based on a daily prompt.

- Utilized the useEffect, useState, and "new Date()" to dynamically fetch a new prompt daily.
- Implemented custom routes in the rails backend for prompt, posts, and user data.
- Imported Bootstrap for styling the frontend.

Project-Slippy - [Github](#) | [Demo](#)

A simple point and clicker game which was a team project made with JS React.

- Gathered the mouse coordinates and used them to create buttons over an image.
- Created custom routes on the frontend using route and switch.
- Utilized useState to set states for animations, dark mode, and if a button is clicked.

MemeFT - [Github](#) | [Demo](#)

A small app made by a team for viewing, buying, and creating Meme NFTs.

- Employed useEffect to fetch data from the backend.
- Utilized useState to set the state to send post requests.
- Created a Sinatra backend for data management.
