## What do hawks eat

When it comes to hawks, they are very just like a hair because hawks are in the the surface of the food chain. Therefore, if you wonder what takes hawks, you will be disappointed to discover that you will find not many predators that prey on hawks. Since hawks are at the top of the food chain, they've several creatures to prey on.

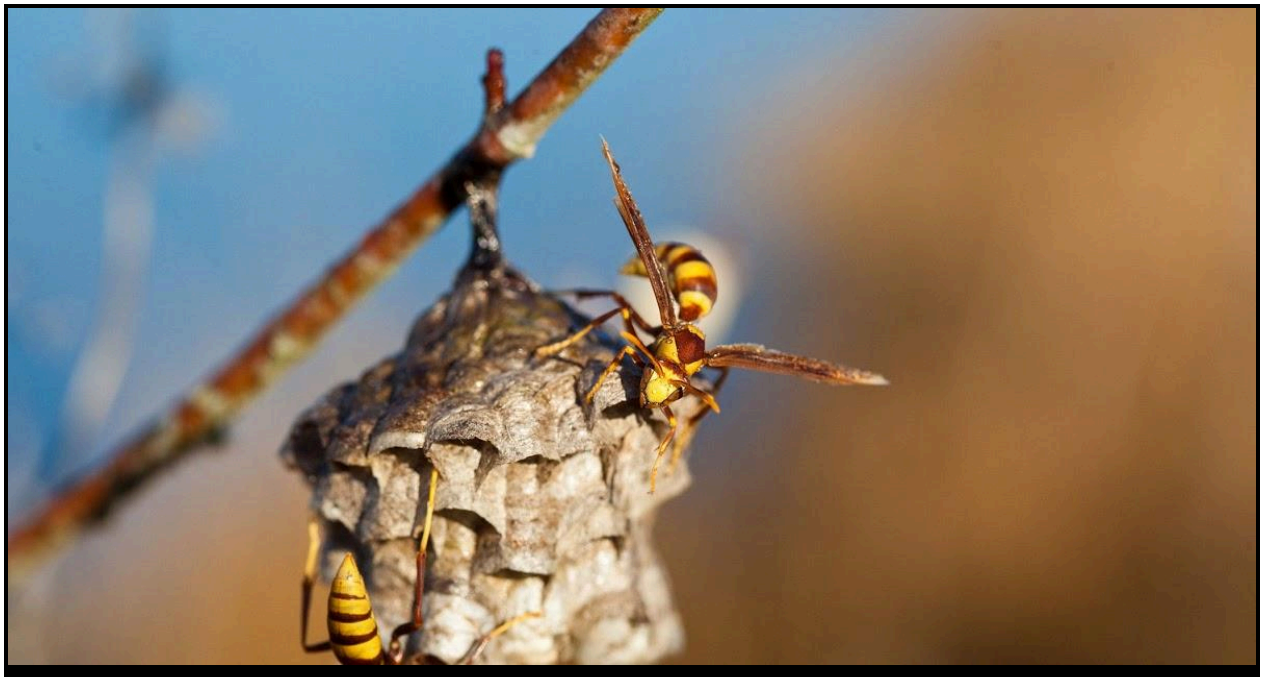

When it comes to the chicken household, hawks are among the top-dogs. And when a hawk gets older, the lesser they have to worry about. The only real chance of a hawk becoming prey to other animals is when they're an egg or a really young hawk.

**Do hawks eat owls-** The most dangerous time for a hawk is before they're created and actually for a period following birth. Each time a hawk is still inside their eggs or their nest, there is a huge chance for different creatures preying on them.

**What do hawks eat in the city-** Snakes or serpents that venture to climb a tree are predators that may feed on hawk eggs. And another predator that will feed on child hawks is other hawk predators. Therefore, hawks sometimes need to bother about different hawks from consuming them.
