- 1 sentence about Brazil (or Brazilian people)
- 1 sentence about Favelas
- 1 sentence about East Oakland
- 1 sentence describing what someone who disagrees with you would argue
- 1 sentence explaining the answer to the big question with 2 reasons why

Brazil is a place where many people visit because an beautiful place and the people are very different buy there skin color alos many people go to Brazil for there carnival,But before Brazil used to be a place where many slaves worked and many slaves moved to the amazon river because smallpox was being spread,Brazil is also a country that has a place called the brazillan favela and in that place there are no laws and anyone could do anytrhing the favela is where there are drug lords and many bad people.East oakland is a place where there are a lot police brutlaty and wherre many pepkle are in gangs and that smoke a lot.In my opinion living in the Brazilian favela is more dangerous than living in East Oakland some people would say that East Oakland is more difficult to live in than the brazilian favela because of many people who have power like police can kill anyone from a different skin color and how there are many crazy people that can hurt you.However,i think that the Brazilian favela is more difficult to live in than East Oakland because their are no laws that people can follow and because you can just see a little kid with a gun anywhere also if you get shot no ambulance would come to heal you so instead your there in the ground dead because no one helped you.
