Lightning Developers
Dev Meeting 2018-02-05

ATTENDEES

Rusty, Christian, jimpo, fabrice

AGENDA

Last Meeting Follow-up

- https://github.com/lightningnetwork/lightning-rfc/issues/341
  - Rusty to update vectors.
- https://github.com/lightningnetwork/lightning-rfc/issues/360
  - @roasbeef: disallow fee updates that are too large and would result in 0-output close transactions
  - (What about similar commitment tx case? Suggest that we have special 0-satoshi-OP_RETURN iff no outputs, and recommend you never get into this situation? --RR)
  - Alternative: dust < reserve_sat
    - Extra check during param validation
    - Avoids ever dusting your reserve output

New Business

- Pull Requests:
  - https://github.com/lightningnetwork/lightning-rfc/pull/352
    - Remove crypto part of sentence, apply.
  - https://github.com/lightningnetwork/lightning-rfc/pull/364
    - Apply
  - https://github.com/lightningnetwork/lightning-rfc/pull/366
    - Apply
  - https://github.com/lightningnetwork/lightning-rfc/pull/367
    - Apply

- https://github.com/lightningnetwork/lightning-rfc/pull/369
    - APPLIED
- https://github.com/lightningnetwork/lightning-rfc/pull/372
    - TODO: Roasbeef fix routing info too?
- https://github.com/lightningnetwork/lightning-rfc/pull/374
    - Roasbeef, jimpo and cdecker to reorg.
- https://github.com/lightningnetwork/lightning-rfc/pull/375
    - Cdecker minor reword, apply?

- Issues:
    - https://github.com/lightningnetwork/lightning-rfc/issues/365
        - See #366 above
    - https://github.com/lightningnetwork/lightning-rfc/issues/368
        - Rusty to audit 'key' to change to 'secretkey' or 'pubkey'
    - https://github.com/lightningnetwork/lightning-rfc/issues/373
        - Implementation-defined, WONTFIX.

- Other:
    - Milan II?
    - Feedback from c-lightning mainnet experiment so far, aka "I've never seen so much blood!"
    - Sync discussion (should be fixed asap?)
    - Standard seed/key-derivation?
