

# **Journey Interview**

Hi \_\_\_\_\_, thank you for taking the time to interview with me. This interview is for me to understand how trading card game players find events to play in. There are no right or wrong answers to these questions, I just want to understand your experience. Are there any questions?

## **Introduction Questions:**

How long have you played a trading card game?

What got you into it?

Do you play multiple card games, if so what else do you play?

## **Tournament:**

Could you walk me through how you find an event or tournament to play in?

What's difficult about it?

What are things you want to know when you look for a tournament?

If you could improve the experience, how would you do it?

If you are in a different area how would you find a tournament to play in?

Have you used the official card game's website to find events? If yes, what was your experience with it?

## **Playgroup:**

Do you want to play with a playgroup, if yes what is the reasoning?

How do you find playgroups to practice or just to play with?

What is your experience with playing with other playgroups?

## **Conclusion:**

Thank you for taking the time to interview with me. I am doing this interview so I could design an app that would help players find events quickly.
